# Commissioner's Foreword

The *Queensland Police Service Annual Statistical Review 2014/15* provides a comprehensive record of crime statistics for Queensland. It includes information on levels of reported and cleared crime, traffic related matters and police personnel. The Statistical Review is one component of the Service's overall performance management and accountability framework.

The Statistical Review also has a strategic role. In order to help ensure the safety and security of Queenslanders, the Service continues to formulate relevant and innovative policing strategies. The information contained in the Statistical Review, when combined with other data, supports evidence based, strategic decision making.

Over the ten year period 2005/06 to 2014/15, the State has recorded decreases in the rate of offences against the person (30%) and offences against property (29%) which has resulted in a decrease of 12% in the overall crime rate.

This trend has been repeated in 2014/15 where the total decrease in the rate of reported crime is 5%. This follows a decrease in 2013/14 of 11% in the rate of reported crime.

This year's Statistical Review reported an increase of less than 1% in the State's overall crime rate (personal, property and other offences) when compared with the previous year.

Key outcomes for 2014/15 when compared to 2013/14 include:

- 3% decrease in the rate of total offences against the person;
- 5% decrease in the rate of total offences against property; and
- 7% increase in the rate of total other offences. These offences (with the exception of domestic violence) are generally detected by police rather than reported by the public, demonstrating a proactive commitment to policing within the community.

Four of the six categories in offences against the person recorded decreases: assault (3%), robbery (17%) and other offences against the person (14%) and other homicide (17% – down 13 offences). Increases were recorded against homicide (murder) (24% – up 11 offences) and sexual offences (9%).

The following categories of offences against property reported decreases: unlawful entry (16%), arson (6%), other property damage (13%), unlawful use of motor vehicle (12%), other theft (excl. unlawful entry) (4%) and handling stolen goods (3%). The only category to record an increase was fraud (26%). This was primarily due to offender arrests following investigations and the clearance of reported crime. In addition, the introduction and significant marketing of the Australian Cyber Crime Online Reporting Network (ACORN), a new national policing initiative of which Queensland is a proud member, has made it easier for community members to report cybercrime.

Ian Stewart APM, Commissioner of Police

In the other offences group, increases were reported in drug offences (20%), prostitution offences (15%), breaching domestic violence protection orders (13%), trespassing and vagrancy (11%), Weapons Act offences (20%), good order offences (3%), and miscellaneous offences (7%).

Decreases were reported in the remaining categories of liquor (excluding drunkenness) (12%), stock related offences (14%), and traffic and related offences (9%). Gaming racing and betting offences recorded no change.

The Queensland Police Service is committed to stopping crime, and supports the Government's objectives of delivering quality frontline services and building safe, caring and connected communities.

We aim to do this through greater use of technology and innovation to deliver a more integrated policing service within an environment of continuous improvement.

The results reported in this year's Statistical Review reflect sustained improvements in safety and quality of life for Queenslanders. I would like to thank all members of the Service, the community and our partners for their ongoing efforts and commitment.

A handwritten signature in black ink, appearing to read 'Ian Stewart'.

Ian Stewart APM  
COMMISSIONER

## Annual Statistical Review 2014/2015\*\*

### Crime Statistics

**Overall crime**  
(personal, property  
and other offences)  
↑ by less than 1%

For ten year period  
**2005/2006**  
to  
**2014/2015**  
**Overall crime**  
↓ by 12%

**Reported Crime**  
**2013/2014**  
↓ 11%  
**2014/2015**  
↓ 5%

### People

Offences against  
the person have  
**decreased by 3%**

**SEXUAL OFFENCES**  
↑ 9%

**234 road fatalities**  
5 more than last year

**12% lower**  
than the previous 5 year average

5877 people reported missing  
5847 were located = 99%

#### HOMICIDE

**Homicide (murder)**  
up by 24%,  
an increase of  
**11 offences**  
**Other homicide**  
down by 17%  
a decrease of  
**13 offences**

Robbery offences have  
decreased by 17%

Armed Robbery  
down 22%

### Property

**PROPERTY CRIME**  
down 5%

Arson (↓ 6%)  
Handling stolen goods (↓ 3%)  
Other property damage (↓ 13%)  
Other theft (excl. unlawful entry) (↓ 4%)  
Unlawful entry (↓ 16%)  
Unlawful use of motor vehicle (↓ 12%)

#### ACORN Australian Cyber Crime Online Reporting

*a new national policing initiative allowing  
the community to report crimes online*  
**fraud offences**  
increased by 26% ↑

### Proactive Policing

#### Other offences are up by 7%

which is an indication of proactive policing as these offences  
(with the exception of domestic violence) are generally detected by police

#### Other Offences include:

Drug offences (20%)  
Good order offences (3%)  
Miscellaneous offences (7%)  
Prostitution (15%)  
Trespassing and vagrancy (11%)  
Weapons Act offences (20%)

5% increase  
in the overall number of charges  
laid against offenders

#### DOMESTIC VIOLENCE

**Breach DV  
Protection Orders**

↑ 13%

**Liquor offences**  
down 12%

#### GOOD ORDER OFFENCES

(e.g. public nuisance, obstruct police)

↑ 3%

**Traffic and related  
offences**

↓ 9%

**Drug offences**  
20%

\*\*Statistics highlighted here are reflective of a range of number and rate of reported offences.

# Queensland Crime

The following tables provide statistics for Queensland for the 2013/14 and 2014/15 financial years, for reported and cleared offences against the person and offences against property and reported other offences.

Reported offence data are presented as both numbers and rates (offences reported per 100,000 persons), together with a percentage change indicator to provide the reader with a clear and balanced picture of the level of crime in Queensland.

Cleared offences are displayed as 'Reported and Cleared in Period' and 'Cleared in Period, Reported Previously'. The 'Percentage Cleared' figures refer only to those offences reported and cleared in the relevant financial year.

# Queensland Crime:

## Offences Against the Person – Reported Offences – Queensland

\* Although offences per 100,000 persons have been rounded to the nearest whole number, the actual rate was used to calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in smaller volume offence categories.

# Crime 2014/15

## Offences Against the Person

The broad offence group of offences against the person is comprised of a number of different offence categories, with the volume of offences reported differing significantly across categories. For example, assaults account for 64% of offences against the person (Figure 1) while homicide (murder) accounts for less than 1%. Thus, assault offences tend to dominate offences against the person, while homicide (murder) will have little effect on the overall total.

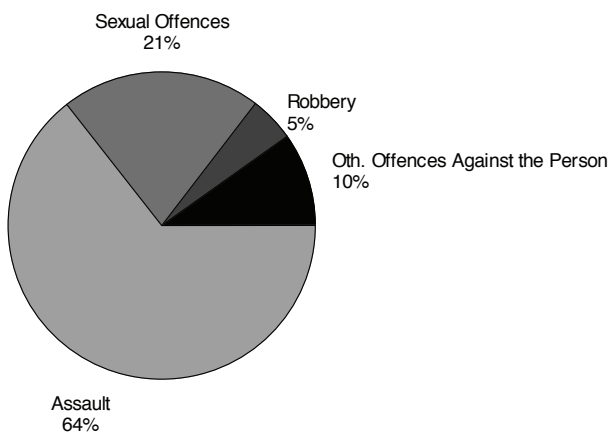

Figure 1: Offences against the person (%) – 2014/15\*

Overall, the number of offences against the person decreased by 1% in Queensland between 2013/14 and 2014/15. A total of 28,144 offences were reported to police in 2014/15, 387 less than the revised figure from the previous financial year. Taking into account the growth of the Queensland population, the rate of offences against the person decreased by 3% from 604 to 587 offences per 100,000 persons.

Of the 28,144 offences against the person reported to police during the 2014/15 financial year, 22,522 (80%) were cleared by the end of June 2015 compared with 79% cleared the previous year. An additional 3,454 offences reported in previous time periods were also cleared during 2014/15.

As with previous years, Northern Region recorded the highest rates of offences against the person, while

Brisbane Region recorded the lowest. Central Region recorded the largest decrease of 10% in the period under review.

Fifteen to nineteen year old females were most likely to have been victims of offences against the person in 2014/15 followed by ten to fourteen year old females. In the younger age groups (five to nineteen years), females were more likely than males to be victims of offences against the person. From the age of twenty-five years, males were more likely than females to be victims. For 57% of victims of solved offences, the offenders were known to them.

More males were proceeded against for offences against the person compared with females. While only 21% of offenders were female, 27% were male aged fifteen to twenty-four years. The likelihood of offending peaked in the fifteen to nineteen year age group for both males and females and decreased with increasing age.

Of those who were found to have committed offences against the person, approximately 58% were proceeded against through an arrest with a further 23% proceeded against through the service of a notice to appear.

## Homicide (Murder)

Homicide (murder) is a small volume offence category and, as such, is subject to sizeable fluctuations from one year to the next and from region to region.

The number of homicide (murder) offences increased by 11 offences in Queensland for 2014/15 compared with 2013/14. Of the 53 homicides reported to police in 2014/15, 49 (92%) were cleared in the same period. An additional 11 offences were cleared from previous periods.

Northern Region recorded the highest increase and South Eastern Region recorded the largest decrease of homicide (murder) offences within the State. The highest rate was recorded by Northern Region and the lowest rate was recorded by Brisbane Region.

This year, 62% of the victims of homicide (murder) were male, however the highest rate of homicide (murder) offences occurred for females in the twenty-five to twenty-nine year age group which recorded a

rate of 4 offences per 100,000 resident persons. In 54% of all solved homicide cases, the offender was known to the victim.

Males were significantly more likely than females to commit homicide (murder) (85%). In 2014/15, males aged twenty to twenty-four and thirty-five to thirty-nine years were most likely to offend. In 95% of cases, the offender was proceeded against through an arrest.

## Other Homicide

As with homicide (murder), other homicide is a low-volume offence category. Therefore, it is subject to marked fluctuations from year to year and from area to area. The number of other homicide offences decreased by 16% during 2014/15, as a result of decreases in attempted murder (5 offences) and driving causing death (10 offences).

Factoring in the increase of the Queensland estimated resident population, other homicide offences decreased by 17% to a rate of 1 offence per 100,000 persons. Of the 70 offences reported to police in 2014/15, 65 (93%) were cleared in the same period. Additionally, 13 offences were cleared from previous periods.

## Assault

Assaults comprise approximately 64% of total offences against the person. As such, they tend to dominate this broad offence group. The rate of assaults in Queensland decreased by 3% from 2013/14 to 2014/15.

The overall decrease in the rate of assaults is attributable to decreases in grievous assault, serious assault other and common assault. Of the 18,048 assaults reported to police in 2014/15, 14,667 (81%) were cleared in the same period with a further 1,885 offences cleared from previous periods.

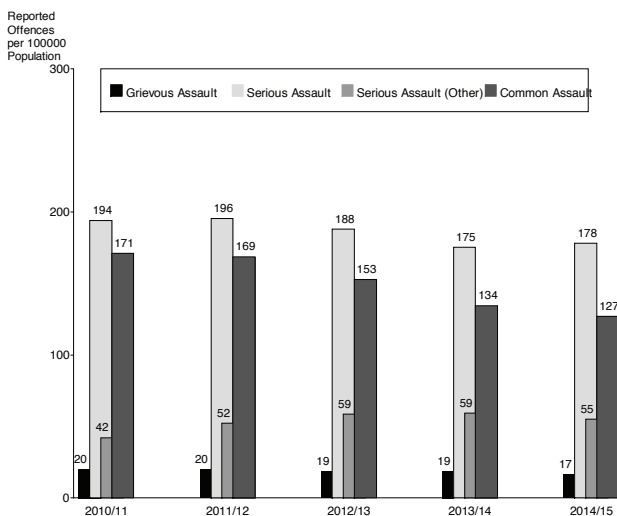

Figure 2: Reported assaults, Queensland, 2010/11 to 2014/15

Higher rates of most of the assault categories were seen in 2011/12 (Figure 2). From 2012/13 the majority of these categories have reported decreases.

The seasonal influence on the occurrence of assaults can be seen clearly in monthly crime trends (see page 19). These offences peak around December of each year and fall to a low around July.

As with previous years, Northern Region recorded the highest rate of assault in the State while Brisbane Region recorded the lowest. Northern Region recorded the only increase in the rate of assault.

For all age groups apart from fifteen to nineteen years, males were more likely than females to be victims of assault. Males aged fifteen to twenty-nine years were most likely to be victims. From age thirty, the rate of victimisation for males decreased steadily. The age of victimisation for females peaked at the fifteen to nineteen year age cohort. From this age, victimisation decreased respectively for each age group. For 55% of victims of solved offences, the offender was known to them.

Across all age groups, males were also more likely to commit offences of assault (75% of offenders were male). Males aged fifteen to twenty-four years were most likely to offend. Of those people proceeded against, 55% were arrested and 28% were served with a notice to appear.

## Sexual Offences

Sexual offences are particularly affected by an unpredictable variability in the reported rates due to the fact that offences occurring decades ago are still being reported to police. As offences are counted against the period in which they are reported, rather than when they occurred, increases in crime statistics do not always equate to an increase in victimisation.

The number of sexual offences reported to police in 2014/15 increased by 10% from the number reported in the previous financial year. The number reported equates to a rate of 123 offences reported per 100,000 persons. The increase in the rate is attributable to an increase of 14% in rape and attempted rape offences and 7% in other sexual offences. Of those offences reported in 2014/15, 4,709 (80%) were cleared, with an additional 1,086 offences cleared from previous periods.

Southern Region recorded the largest decrease in sexual offences with South Eastern Region and Brisbane Region recording the largest increase of 21%. The lowest rate was recorded by Brisbane Region.

The Sexual Offence category is one of two offence categories for which there are more female victims than male (82% of victims were female). Females aged

between ten and nineteen years were most likely to be victims of sexual offences. Females in this age group comprise 44% of total victims. For 75% of victims of solved offences, the offender was known to them. In 35% of solved cases, the offender was a family member.

In total, 125 females committed sexual offences in 2014/15. Thus, 95% of offenders were male. The age distribution of male offenders is unique for this offence type in that the distribution is almost uniform across all age groups with the exception of fifteen to nineteen year olds. The number of offenders is only slightly lower in the older age groups, with males aged fifty years and over representing 20% of all sexual offenders. For those proceeded against, 59% were arrested and 9% were served with a notice to appear.

## Robbery

A decrease of 16% in the number of robberies reported to police in 2014/15 was due to a decrease in the number of armed robberies of 21% and unarmed robberies of 10%. A total of 1,319 offences were reported to police, which equates to a rate of 28 offences per 100,000 persons. Of these, 918 (70%) were cleared in the period in which they were reported, with an additional 109 offences cleared from previous periods.

The rate of robbery offences have decreased steadily since 2012/13. The number of reported armed robbery offences recorded a decrease of 21% and unarmed robbery recorded a 10% decrease in 2014/15. (Figure 3).

Figure 3: Reported robbery offences, Queensland, 2010/11 to 2014/15

All Regions reported decreases in Robbery offences in 2014/15. Central Region recorded the largest decrease of 25% and the lowest rate. South Eastern Region recorded the highest rate of robbery in the State.

For every age group, males were more likely than females to be victims of robbery, with males aged fifteen

to nineteen years most likely to be victims. Males were victim to robbery in 68% of all cases reported to police. For the majority of victims (70%) of solved robbery offences, the offender was unknown to them.

Males were significantly more likely than females to commit robbery offences (82% of offenders were male) and 30% of male offenders were aged between fifteen and nineteen years. Of those proceeded against for robbery offences, 81% were arrested and 8% issued with a notice to appear.

## Other Offences Against the Person

The category of other offences against the person includes offences such as kidnapping and abduction, deprivation of liberty, extortion, stalking and life endangering acts.

In 2014/15, other offences against the person decreased by 13% from 3,176 to 2,759 offences. When taking into account the growth of Queensland's population, the rate decreased by 14%. Of the 2,759 reported other offences against the person, 77% were cleared in the same period. In addition, 350 offences reported in previous periods were also cleared.

Females represented 54% of victims of total other offences against the person. People most likely to be victims of other offences against the person were female and aged between fifteen and twenty-four years. For 52% of victims of solved offences, the offender was known to them.

## Offences Against Property

The offence group of offences against property is comprised of a number of offence categories. As with offences against the person, the contribution of each category to the total differs significantly (Figure 4). In 2014/15, other theft (excl. unlawful entry) accounted for 49% of total offences against property and was the highest in volume of the property offence categories. Unlawful entry and other property damage each accounted for 16% of offences, with fraud accounting for 11%. As such, this broad offence group tends to be dominated by other theft (excl. unlawful entry) and unlawful entry with Intent, with offence categories such as arson having little effect.

The number of reported offences against property for the 2014/15 period decreased by 4% when compared with the 2013/14 period. Factoring in the growth of the Queensland population, offences against property were reported at a rate of 4,140 offences per 100,000 persons in 2014/15, a decrease of 5% from the previous year. Of all offences against property reported in 2014/15, 40% were cleared in the same period with a further 12,988 offences cleared from previous periods.

Figure 4: Offences against property (%) – 2014/15\*

Footnote: \* Percentages have been rounded to the nearest whole number. Therefore, although the percentages are correct, they do not add to 100%.

Northern Region recorded the highest rate of offences against property (5,272 offences per 100,000 persons) in the State, while South Eastern Region recorded the largest decrease (8%). Central Region recorded the lowest rate (3,342 offences per 100,000 persons).

Overall, offences against property were more likely to be committed by males (74% of offenders were male). Over one quarter (30%) of offenders proceeded against for offences against property were male aged between ten and nineteen years. Of the total people proceeded against for offences against property, 43% were arrested, 42% were served with a notice to appear and 8% were cautioned.

## Unlawful Entry

The number of unlawful entry offences decreased by 15%. This equates to a 16% reduction in the rate once the growth of the Queensland population is taken into account. Of the 31,642 offences reported to police in 2014/15, 7,969 or 25% were cleared in the same period with a further 1,766 offences cleared from previous periods.

The number of unlawful entry of dwellings decreased by 18%, the number of unlawful entry of shops decreased by 25% and unlawful entry of other premises decreased by 5%.

All five of the Regions recorded decreases, the largest of which was South Eastern Region and Southern Region (20%). Northern Region recorded the highest rate (999 offences per 100,000 persons) while Central Region recorded the lowest rate (521 offences per 100,000 persons).

Most unlawful entry offences were committed by males (87%), of those, 64% were male aged under twenty-five years. Of all offenders proceeded against for unlawful entry offences, 61% were arrested, 8% cautioned and 22% served with a notice to appear.

## Arson

Arson is the lowest in volume of the offences against property categories and, as such, exerts very little influence on the offences against property total. Arson offences decreased by 5% from 2013/14 to 2014/15. The rate of offences decreased by 6%, from 25 to 24 offences per 100,000 persons. Of the 1,139 offences reported in 2014/15, 287 (25%) were cleared in the same period. An additional 38 offences were cleared from previous periods.

Brisbane and South Eastern Regions recorded decreases of 23% and 24% respectively. Northern Region recorded the largest increase (23%), and Brisbane Region recorded the lowest rate. The highest rate was recorded by South Eastern Region.

This year, 85% of offenders were male with fifteen to nineteen year old males being the most likely to be proceeded against for arson. Approximately 55% of offenders were arrested, 15% cautioned and 14% served with a notice to appear.

## Other Property Damage

The number of other property damage offences reported in 2014/15 decreased (12%) when compared to the previous financial year. The rate of offences decreased by 13%, from 768 to 667 offences per 100,000 persons. Of those offences reported to police in 2014/15, 10,932 (34%) were cleared during this

period, with an additional 1,527 offences cleared from previous time periods.

Northern Region recorded the highest rate of 1,135 offences per 100,000 persons. The largest decrease was recorded by Brisbane Region (20%) where the lowest rate was also reported (494 offences per 100,000 persons).

As with most offence types, fifteen to nineteen year old males were most likely to be proceeded against for other property damage offences. Only 18% of offenders were female and only 10% of all offenders were aged forty years or more. In total, 44% of offenders were arrested for this offence type, 12% were cautioned and 36% were served with a notice to appear.

## Unlawful Use of Motor Vehicle

The rate of unlawful use of motor vehicle offences decreased by 12% in 2014/15. This reduction is equivalent to 1,147 fewer offences reported during 2014/15.

In 2014/15, 9,145 unlawful use of motor vehicle offences were reported to police. Of these, 4,022 (44%) were cleared during this period, with an additional 657 offences cleared from previous periods (note: for recovery rates see page 13). In 2014/15, unlawful use of motor vehicle offences were reported at a rate of 191 offences for every 100,000 persons.

The largest decrease in unlawful use of motor vehicle offences was recorded in Southern Region. The highest rate was reported in South Eastern Region and Central Region reported the lowest rate of 113 offences per 100,000 persons.

Males aged fifteen to nineteen years were most likely to commit unlawful use of motor vehicle offences (33% of male offenders were in this group). Thirty six percent of female offenders were aged fifteen to nineteen years. Approximately 64% of offenders were arrested and 23% were served with a notice to appear.

## Other Theft (excluding Unlawful Entry)

The rate of other theft (excluding unlawful entry) offences decreased by 4% from 2013/14 to 2014/15. This category is the highest in volume of the offences against property categories and thus exerts a significant influence on property crime as a total. In 2014/15, 96,854 other theft offences were reported to police, of which 37% were cleared during this period. A further 5,218 were cleared from previous periods.

Three of the four sub-categories of other theft offences recorded decreases in the number of offences reported: stealing from dwellings (6%), steal from vehicles (7%), and other stealing (3%).

The highest rate of other theft (excluding unlawful entry) occurred in South Eastern Region while the lowest rate was recorded in Central Region in the year under review. Southern Region recorded the largest decrease (7%) of other theft (excluding unlawful entry) offences during 2014/15.

The proportion of female offenders for other theft was higher than for most other offence types at 34%, or just under one third. For both males and females, those in the fifteen to nineteen year age group were most likely to commit other theft offences. Arrest rates are low for this offence type at 34%, while 51% were served with a notice to appear. Ninety-four percent of offenders cautioned were juvenile (i.e. aged between ten and sixteen years).

## Fraud

Queensland recorded an increase in the number of offences per 100,000 persons in most sub-categories of fraud offences during the current period; fraud by credit card offences (20%), Identity fraud offences (52%) and other fraud offences (36%). This resulted in an overall increase of 26% in total fraud offences. Fraud by computer and fraud by cheque offences reported decreases of 11% and 33% respectively in 2014/15.

Of the 22,644 offences reported in 2014/15, 14,904 (66%) were cleared in the same period with a further 3,468 offences cleared from previous periods.

Southern Region recorded the highest rate of fraud offences as well as the largest increase in these offences. Central Region recorded the lowest rate in the State.

A relatively higher proportion of females commit fraud offences compared with other offence types. Approximately 35% of offenders were female. Males aged fifteen to nineteen years and females aged twenty-five to twenty-nine years were most likely to commit fraud offences. Forty percent of offenders were arrested, while 47% were issued with a notice to appear.

## Handling Stolen Goods

Handling stolen goods offences recorded a decrease in the number of offences reported. The rate of offences decreased by 3%, from 108 to 105 offences per 100,000 persons. Of the total 5,012 offences reported to police in 2014/15, 4,586 (92%) were cleared in the same period, with a further 314 offences cleared from previous periods.

Northern Region recorded the highest rate of handling stolen goods offences while Southern Region recorded the only increase (6%). Central Region recorded the lowest rate and Brisbane Region recorded the greatest decrease (8%) in the year under review.

As with most offence categories, males were most likely to commit handling stolen goods offences (73% of offenders were male) and males in the fifteen to nineteen year age group were most likely to offend. Offenders were more likely to be served with a notice to appear (52%) although 41% were arrested.

## Other Offences

Other offences comprises a range of disparate offence categories. These categories are distinct from offences against the person and property in that they are generally offences detected by police rather than being reported by the public. Drug offences, traffic offences and prostitution offences are examples of this. Trends and patterns in the levels of other offences are therefore often indicative of specific and proactive initiatives of the Police Service rather than being indicative of the level of crime actually occurring. As such, increases are often seen as a positive improvement of police detection rates.

As a total, the number of other offences increased by 8% state-wide from 202,079 offences recorded in 2013/14 to 218,871 offences recorded in 2014/15. This equates to a rate of 4,566 offences per 100,000 persons in 2014/15.

Northern Region recorded the highest rate of other offences in the state while Brisbane Region recorded the lowest rate. The greatest increase was recorded by Southern Region.

## Drug Offences

Increases in four of the five sub-categories of drug offences contributed to an overall increase of 22%. When taking into account the growth of Queensland's population, drug offences recorded an increase of 20%.

Southern Region recorded the highest rate of drug offences in the State. All five Regions reported increases with South Eastern Region recording the largest increase. The lowest rate was recorded by Brisbane Region (1,318 offences per 100,000 persons).

## Breach of Domestic Violence Protection Orders

Breach of domestic violence protection orders are a breach of a court order and, as such, are classed as "Regina" offences; hence, the inclusion under other offences and not offences against the person.

The 2014/15 financial year saw a 14% increase in the number of breach of domestic violence protection orders. A total of 16,654 offences were reported to police, equating to a rate of 347 offences per 100,000 persons.

Brisbane Region recorded the lowest rate of Breach of Domestic Violence Protection Order offences in the State, while Northern Region recorded the highest. South Eastern Region recorded the largest increase (22%).

## Weapons Act Offences

The number of Weapons Act offences increased by 22% from 4,940 offences reported in 2013/14 to 6,032 offences reported in 2014/15. The overall increase is attributable to increases in two of the five weapons sub-categories. Increases were recorded in possession and/or use other weapons; restricted items (15%) and Weapons Act offences – other (38%).

All five regions recorded increases in Weapons Act offences during the 2014/15 financial year. Northern Region recorded the largest increase of 33%. During 2014/15, Southern Region recorded the highest rate of 167 offences per 100,000 persons while Brisbane Region recorded the lowest rate of 82 offences per 100,000 persons.

## Good Order Offences

The number of good order offences increased by 4% from 2013/14 to 2014/15. A total of 60,346 offences were detected by police which equates to a rate of 1,259 offences for every 100,000 persons. An increase in resist incite hinder obstruct, fare evasion and public nuisance offences contributed to the overall increase.

Northern Region recorded the largest increase of 5% and the highest rate of good order offences. The lowest rate was recorded by Brisbane Region and the only decrease was reported by South Eastern Region.

## Traffic and Related Offences

Traffic and related offences decreased by 8% from 42,529 to 39,093 offences. Three of the four sub-categories recorded decreases of which the largest was a 12% decrease in disqualified driving. Drink driving is the largest in volume of the sub-categories and, as such, exerts the greatest influence on the traffic and related offences total. The rates for this sub-category recorded an 8% decrease per 100,000 persons.

South Eastern Region recorded the largest decrease while Brisbane Region recorded the lowest rate. Northern Region recorded the highest rate of 1,229 offences per 100,000 persons.

Please note that the traffic and related offences category referred to above includes dangerous operation of a vehicle, drink driving, disqualified driving and interfere with the mechanism of a motor vehicle only. For information on Speed and Red Light Camera Notices or Random Breath Tests please refer to the traffic section on pages 135-142.

## Monthly Crime Trends

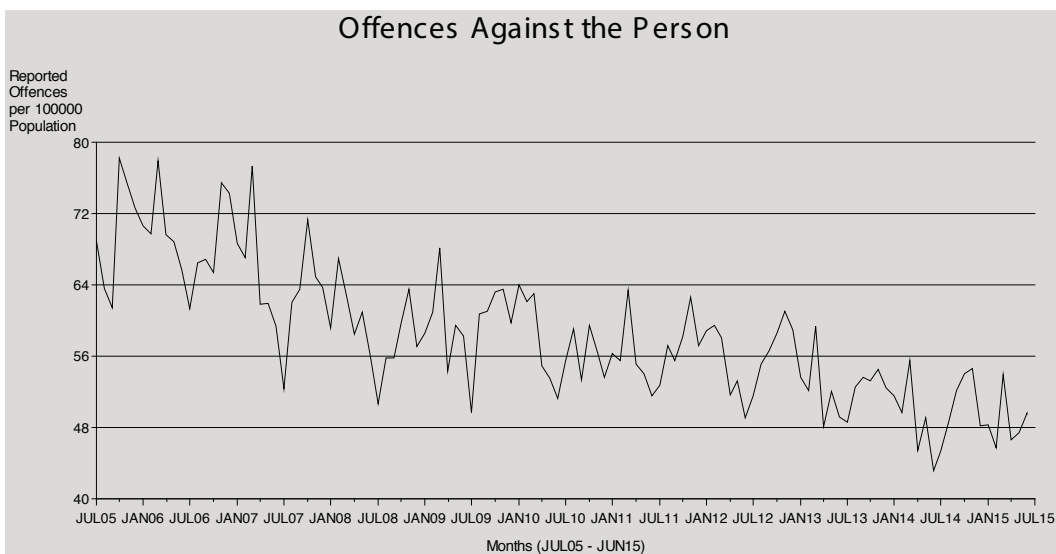

The graphs in this section provide monthly data for selected offence categories from July 2005 (2005/06 financial year) to June 2015 (2014/15 financial year), expressed as a rate, thereby factoring in the size of the Queensland population for each year. All crime statistics appearing in these graphs are comparable over the ten year period except where indicated with a break in continuity.

*Australian Demographic Statistics*, December Quarter 2014 (3101.0), Australian Bureau of Statistics were used to calculate the rates up to June 2014.

To test for a statistically significant trend in the following graphs, Kendall's rank order correlation test (Conover, W.J. 1971 *Practical Non-Parametric*

*Statistics*, 2nd edition, John Wiley and Sons, pages 256-260) was used. Although the 5% level of significance was used, most results were significant at the 1% level. Details are footnoted where appropriate in the text under each graph. This test is a two-tailed test which determines whether there is an increasing or decreasing trend in the recorded number of offences over the one hundred and twenty month period covered in the report.

Some month to month variations in the numbers of recorded offences suggested seasonal factors may be operating. The test for trend is not sensitive to seasonal variations; it is sensitive only to a generally increasing or decreasing trend over the time period examined.

Total offences against the person has a statistically significant\* decreasing trend over the ten year period. This broad offence group tends to be dominated by assaults as is evidenced by the strong seasonal influence recorded by the time series. During the last financial year, offences against the person peaked in December due to the higher number of assaults and other offences against the person reported in the month.

# Monthly Crime Trends

Over the ten year period there is a significantly decreasing trend\* in the homicide (murder) time series. This small volume offence is subject to marked fluctuations from one month to the next. The spike in December 2014 relates to 1 occurrence involving 8 victims. There were 53 reported murders in 2014/15 for Queensland which is 11 more than the previous year.

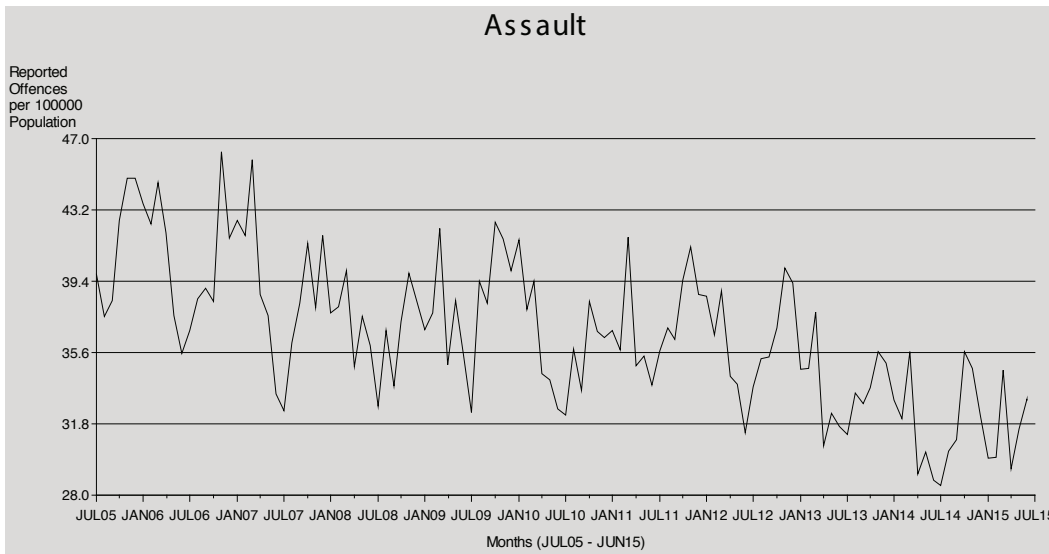

As with homicide (murder), other homicide is a low volume offence category and, as such, is subject to random fluctuations from month to month.

Over the ten year period, there is no statistically significant decreasing or increasing trend\* for the other homicide time series. Other homicide reported a decrease of 17% in the 2014/15 financial year.

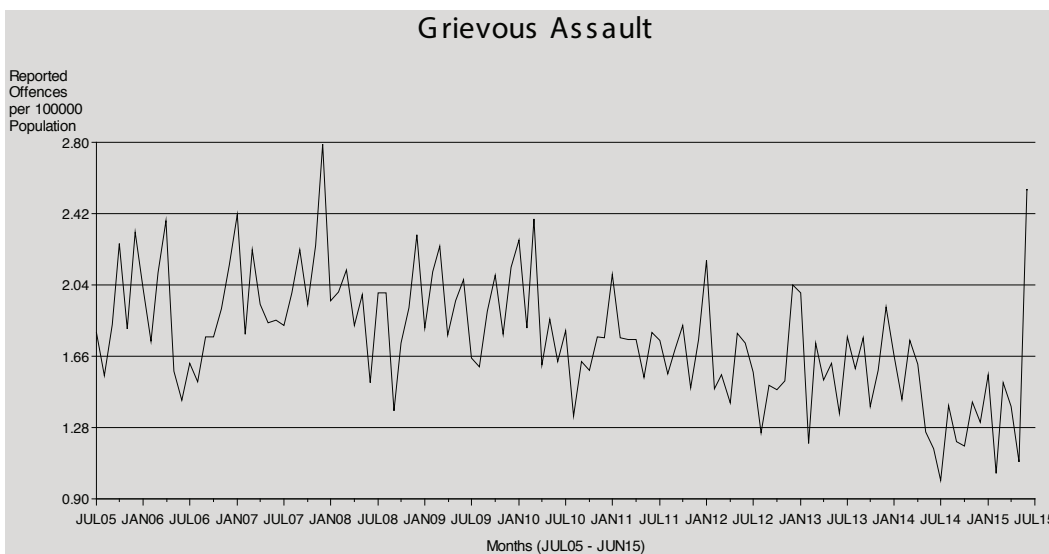

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

Assault is the largest in volume of the offences against the person categories. There was a statistically significant decreasing trend\* detected for the 2014/15 period.

Assault offences are subject to strong seasonal influences, which are evident in the time series, with a higher rate of offences occurring over the summer months and a lower number of offences occurring in the winter.

Grievous assault is a small volume offence and, as such, will be subject to marked fluctuations over time. Overall, the rate of grievous assaults has reported a statistically significant decreasing trend\* over the ten year period.

The seasonal influence is obvious in the time series with the peaks occurring in the summer months.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

Again, the strong seasonal influences are evident in this time series, with a higher rate of offences occurring over the summer months and a lower rate of offences occurring in the winter months of each year. A significantly decreasing trend was detected over the ten year period\*.

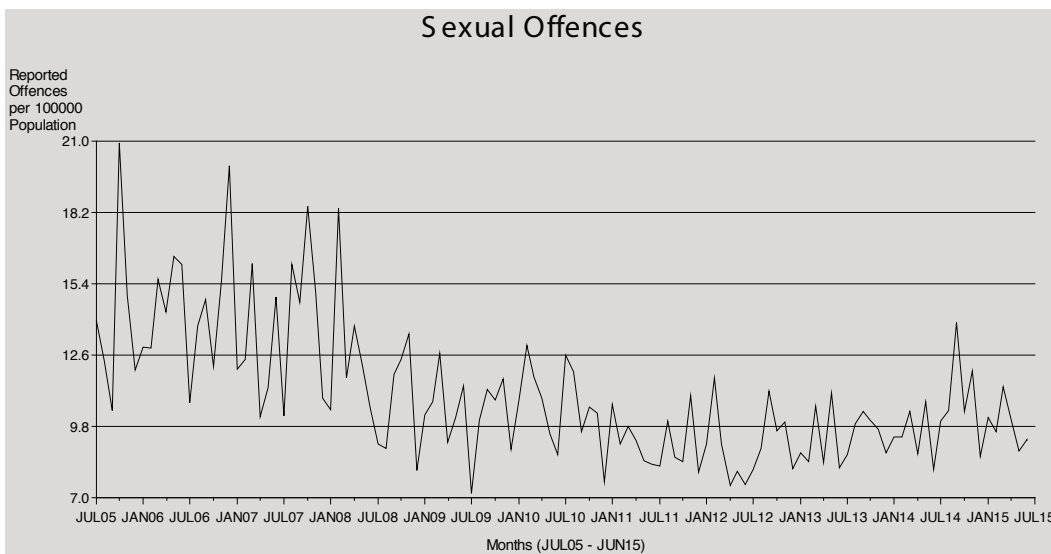

Serious assault (other) has a significantly increasing trend\* over the ten year period. Although less apparent than for the other sub-categories of assault, the peaks and troughs reflect the strong seasonal influence exerted on the time series with the higher rates occurring in the summer months.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

The stability in the trend of common assault offences continues into 2014/15. There is a statistically significant decreasing trend\*. As with all sub-categories of assault, the seasonal influence is apparent in the graph above.

The spikes in the sexual offences time series are the result of large numbers of offences being reported to police. All are due to single offenders who were responsible for multiple offences for incidents occurring over a number of years. Overall, this time series records a statistically significant decreasing trend\*.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

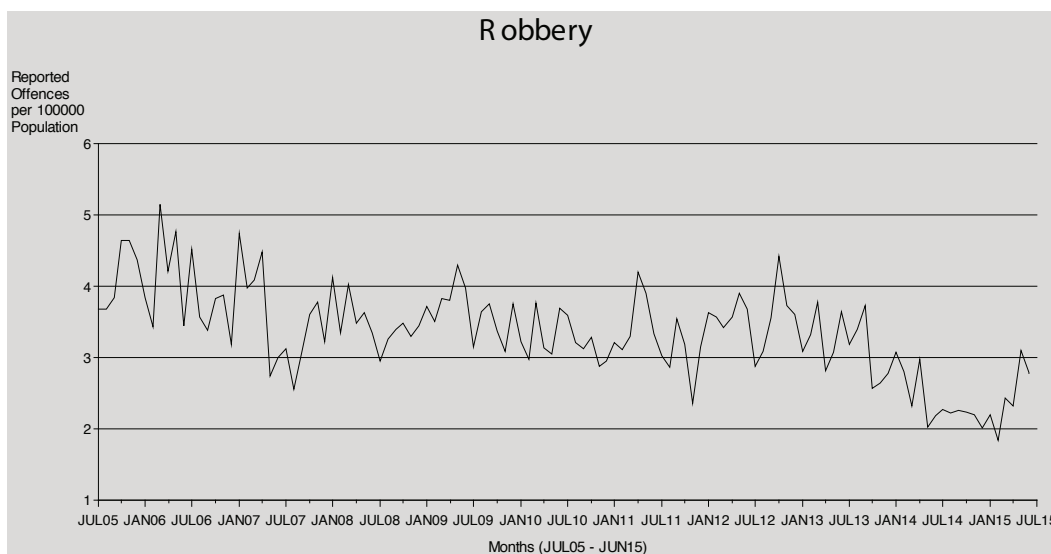

The spike in these offences in May 2006 was due to a single offender who was responsible for multiple offences occurring over a number of years. Overall, rape and attempted rape offences over this time series records a statistically significant decreasing trend\*.

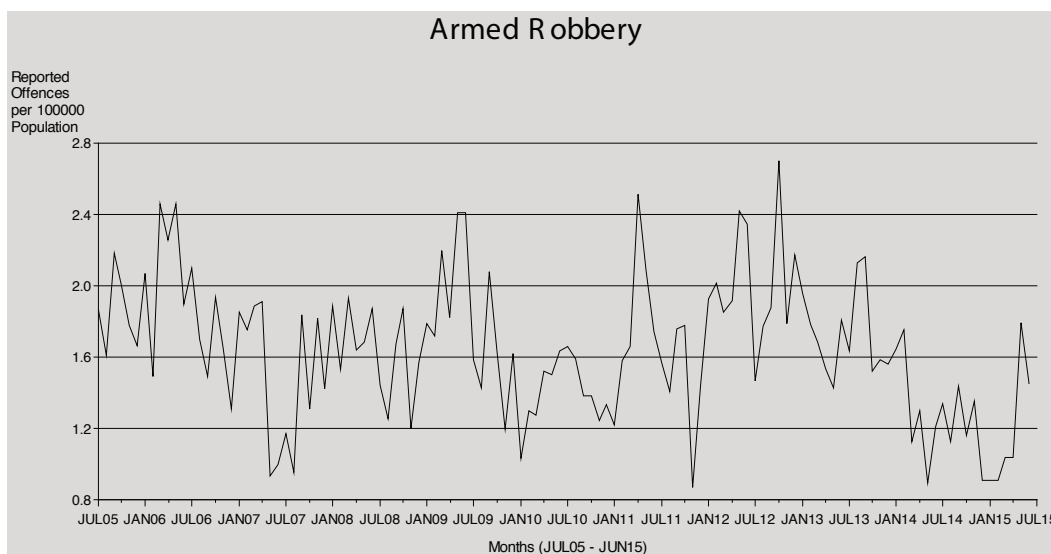

Multiple reports relating to historical offences with large counts were responsible for the spikes in October 2005 and December 2006. Overall, other sexual offences over this time series records a statistically significant decreasing trend\*.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

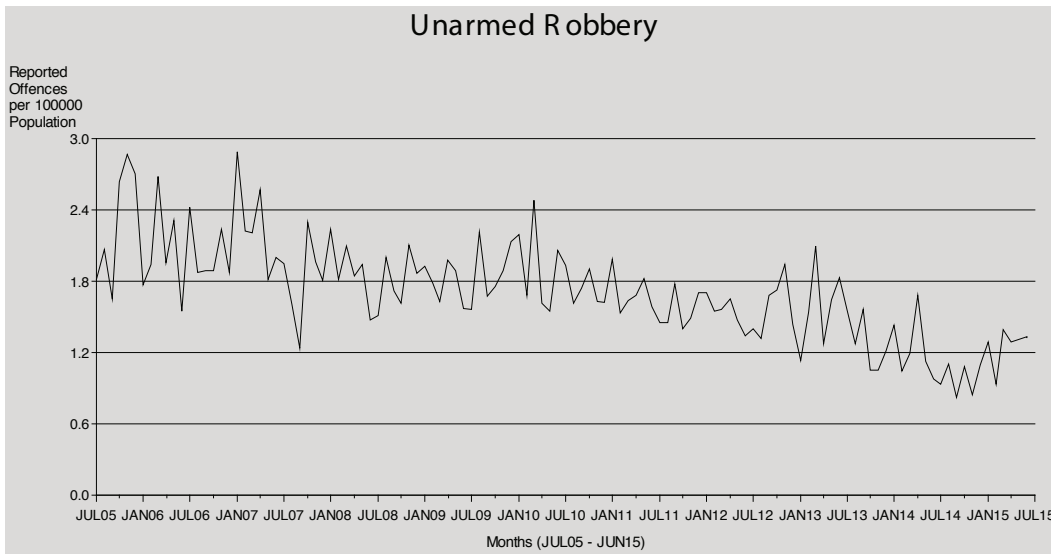

Rates of robbery offences peaked between March and May 2006, May 2009 and May 2011. Rates have then decreased noticeably from the peak in October 2012. Since 2005/06, rates of robbery offences continued to decrease and have recorded a significantly\* downward trend.

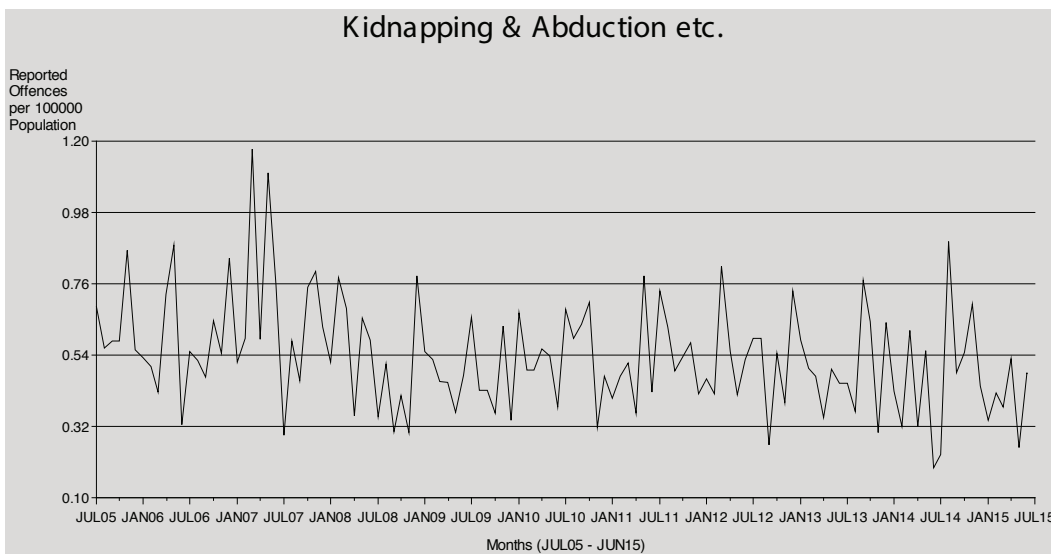

The overall trend in the rate of armed robbery has been decreasing significantly\* since 2005/06. The time series offences peaked between March and May 2006, May 2009, May 2011 and again in October 2012, however, armed robbery has recorded a decrease of 22% in the current period under review.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

Rates of unarmed robbery have recorded fluctuations over time. Since recording a peak in December 2006 the rate of unarmed robbery has continued to record an overall downward trend\*. During the current period, unarmed robbery recorded an increase of 12%.

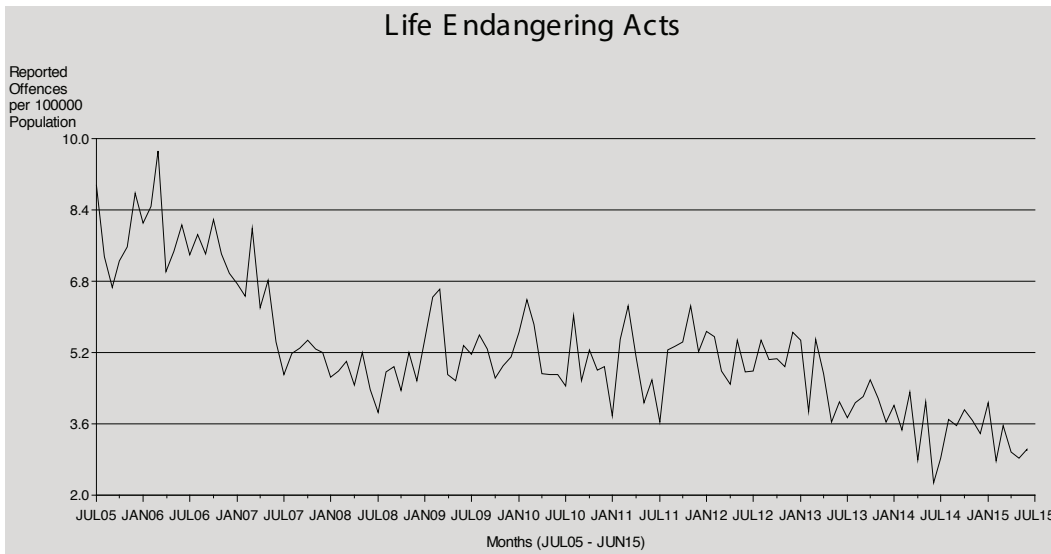

This time series is subject to the fluctuations that occur in small volume offence categories. The rates of kidnapping and abduction etc. offences have been steadily decreasing over the ten year period of the time series and records a statistically significant decreasing trend\*.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

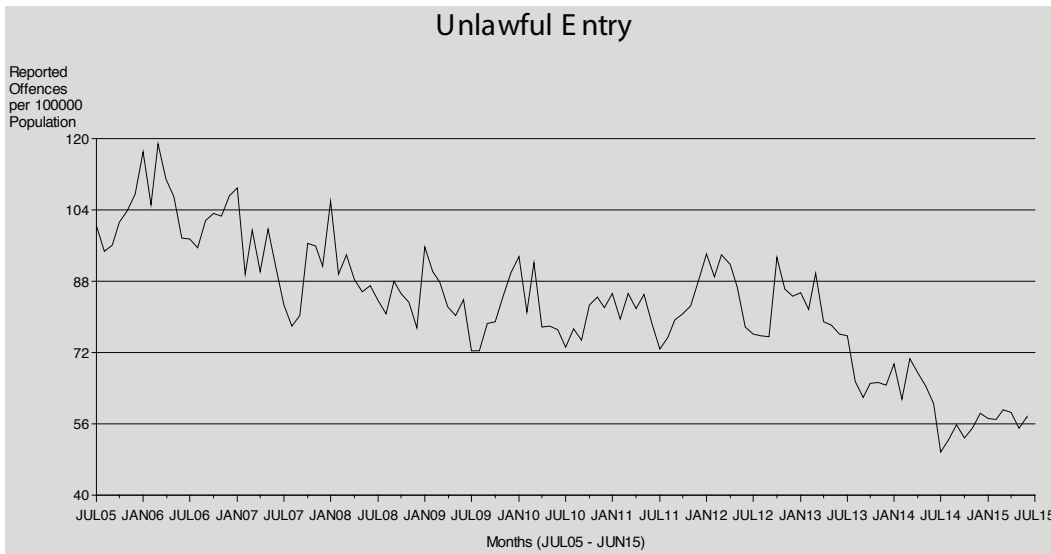

The rate of life endangering acts offences have been steadily decreasing since January 2006 and records a statistically significant decreasing trend\* over the ten year period.

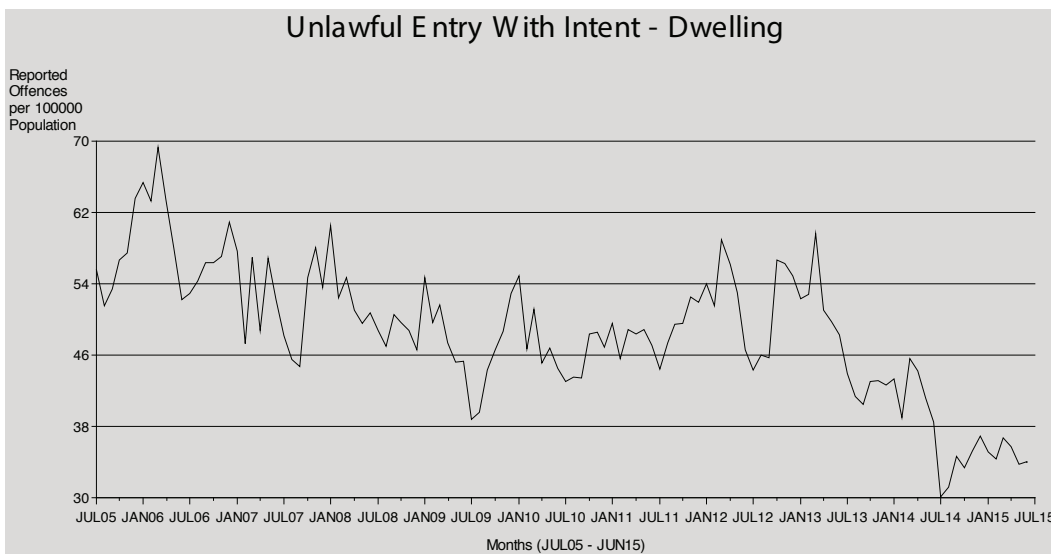

The offences against property time series has historically been reasonably stable. Since 2005/06 a statistically significant downward trend\* has been detected. This is a large volume offence group and, as such, increases or decreases are usually small in the overall context. In the current time period, offences against property decreased by 5%.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

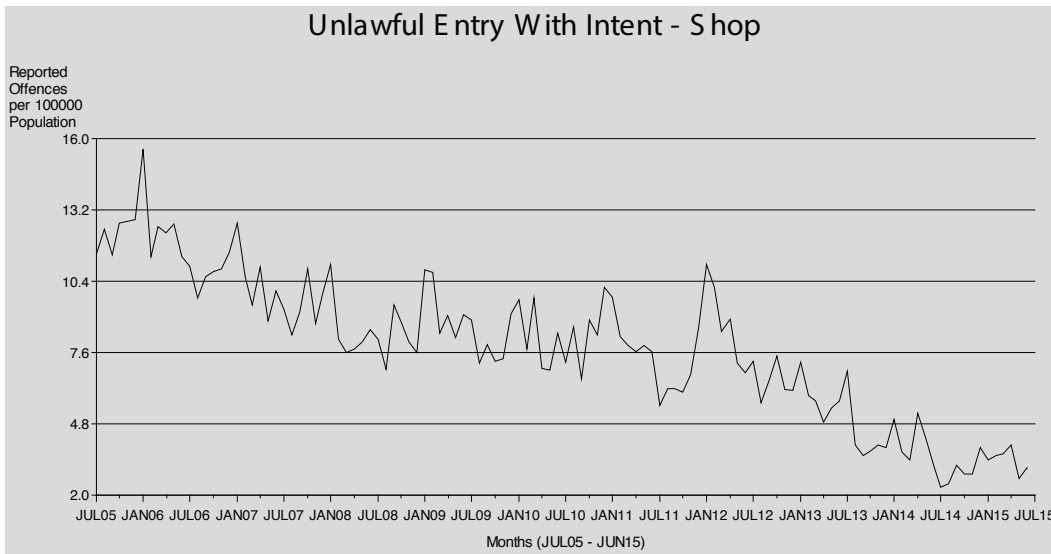

Overall, there was a statistically significant decreasing trend detected\* for unlawful entry. In the current period, the rate of unlawful entry offences decreased by 16% following on from a decrease of 19% in the 2013/14 financial year.

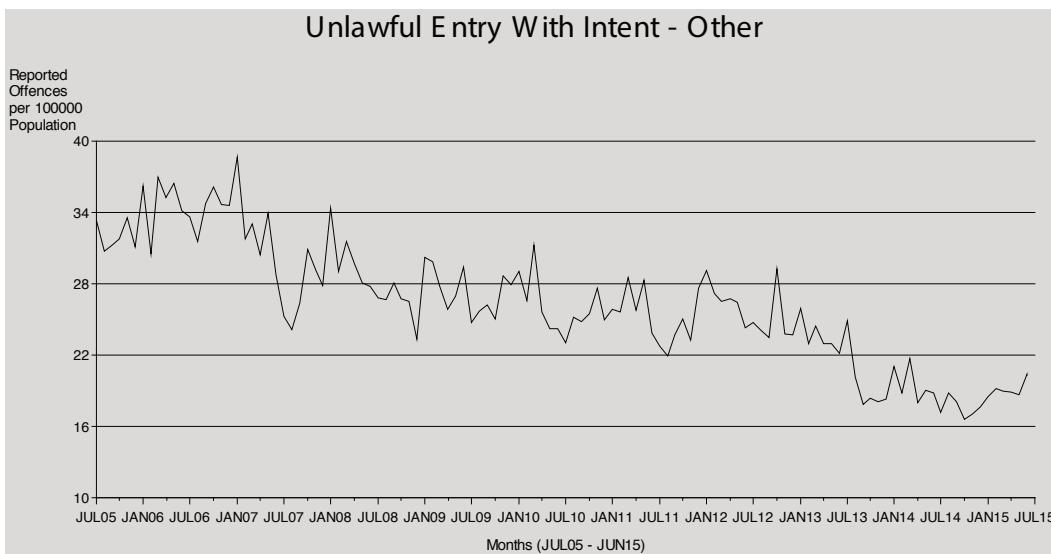

The rate of unlawful entry with intent – dwelling has been steadily decreasing from 2005/06 to the extent that an overall statistically significant decreasing trend\* was detected. The rate continued to decrease reflecting a 19% reduction in the current review period. The fact that this offence is subject to seasonal variation is evidenced in the graph above.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

Over the ten years, the rate of unlawful entry - shops offences has been significantly decreasing\*. Unlawful entry - shops offences recorded a 26% decrease for 2014/15 financial year. This follows a 31% decrease recorded in the previous year.

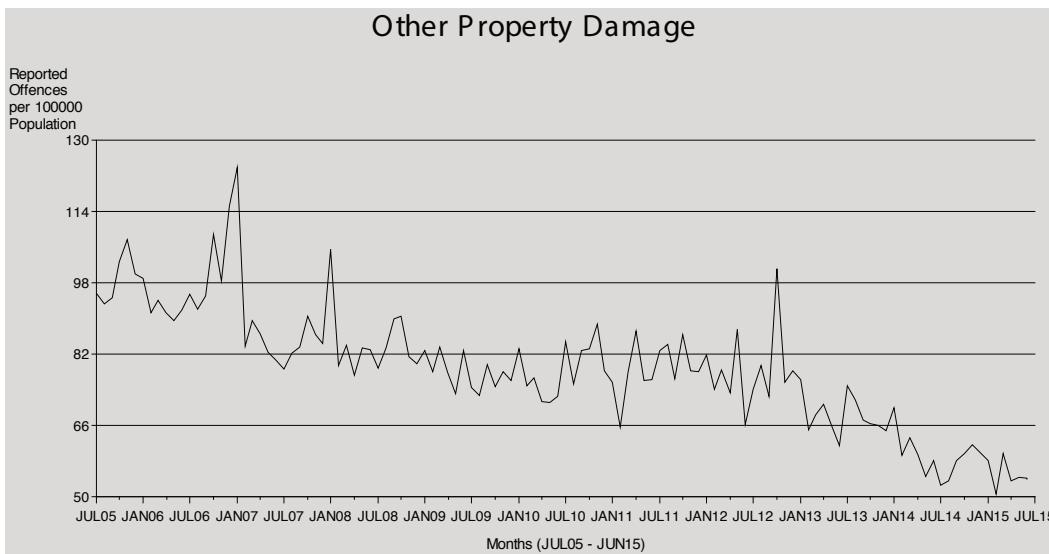

Overall, there was a significantly decreasing trend\* detected for unlawful entry - other premises. The reductions over the last ten financial years are apparent at the end of the time series. Unlawful entry – other premises recorded a 7% decrease in the current period under review.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

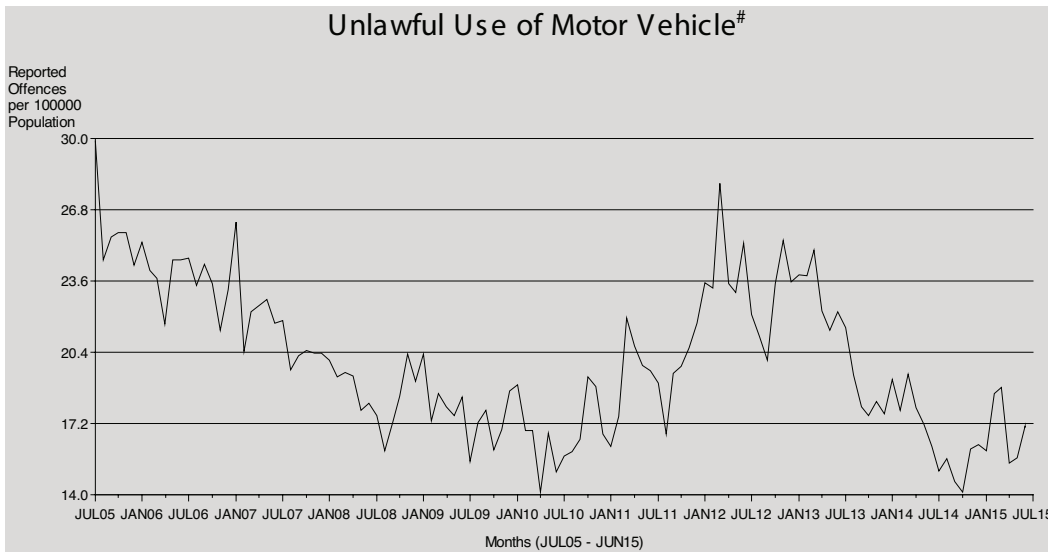

Over the ten years of the time series, a statistically significant downward trend\* was detected for arson offences. For the year under review, the rate of arson offences decreased by 6%.

Over the ten years of the time series, a statistically significant downward trend\* was detected for other property damage offences. For the year under review, the rate of other property damage offences decreased by 13% following a decrease of 13% in the previous year.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

Overall, a statistically significant decreasing trend\* was detected for the unlawful use of motor vehicle time series. An increase in these offences occurred between 2009/10 and 2012/13. Following this, a sizeable decrease was reported in 2013/14 of 20%, the rate of offences fell a further 12% in the current period.

No statistically decreasing or increasing trend\* was detected for the other theft (excluding unlawful entry) category. A decrease in offences can be seen from July 2005 until July 2008 followed by increases until approx. 2011/12. However, the current period recorded a 4% decrease following a 7% increase recorded during the previous period.

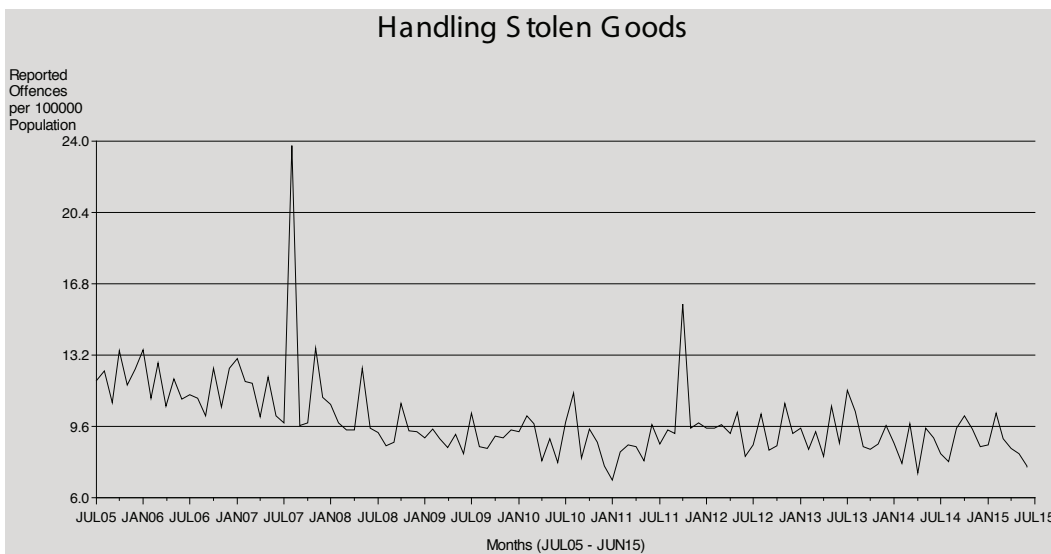

# Includes attempted offences.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

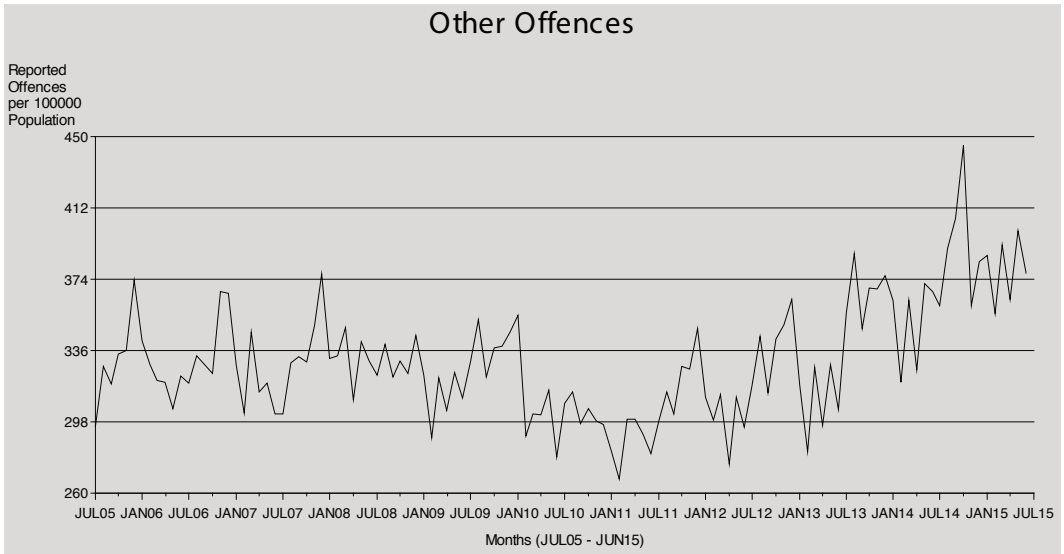

There is a statistically significant downward trend\* in fraud offences over the past 10 year period. This year fraud offences overall reported a 26% increase, this was attributed to increases in fraud by credit cards, identity fraud and other fraud offences.

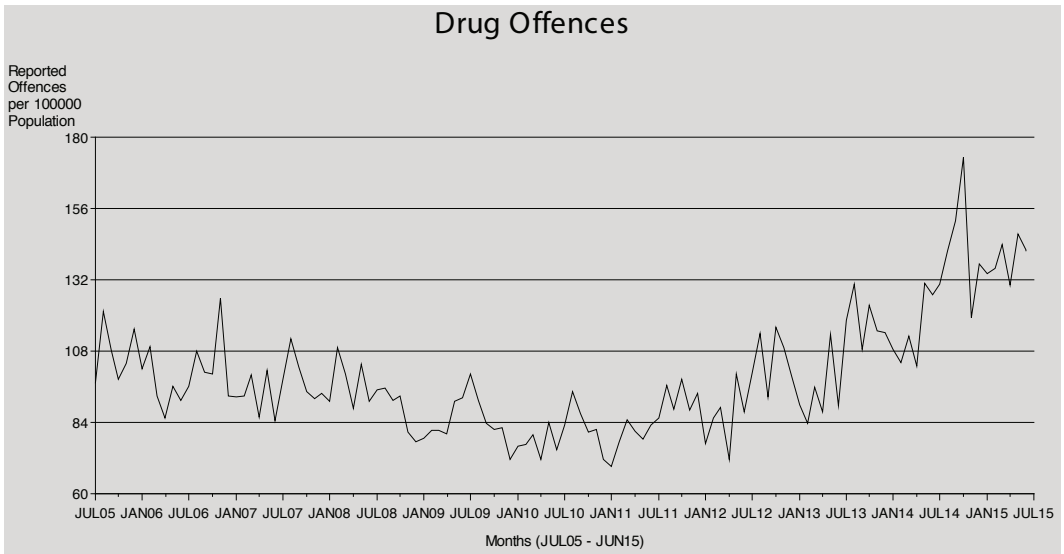

A statistically significant decreasing trend\* is evident in the handling stolen goods time series. In 2014/15, the rate of offences decreased by 3% following a decrease by 1% during 2013/14. The spike in 2011/12 was the result of 225 offences preferred against two offenders in October 2011.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

Other offences are generally detected by police rather than reported to police. As such, any rise in other offences is usually regarded as a positive result. As is evidenced in the graph above, a statistically significant upward trend\* was detected. The State recorded an increase of 7% in the current period.

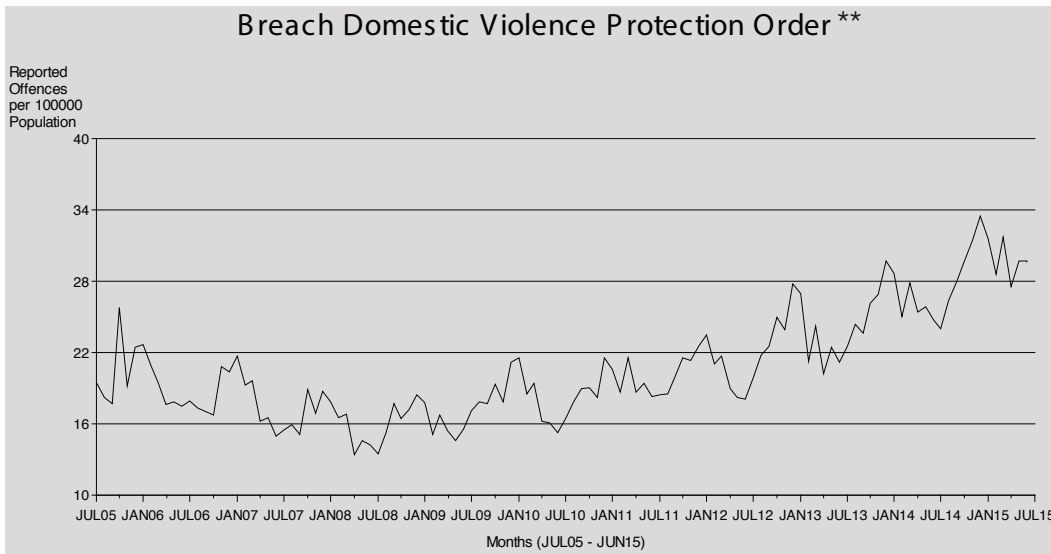

A statistically significant increasing trend\* was detected for this time series over the ten year period. The spike in October 2014 was the result of multiple operations throughout the State. The State recorded an increase of 20% in the current period.

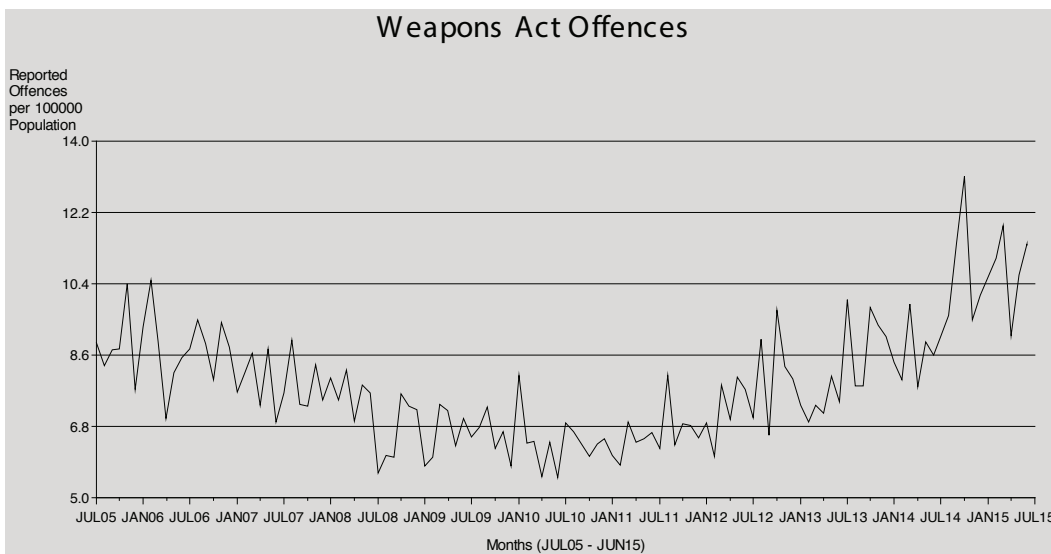

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

# Monthly Crime Trends

Breach of domestic violence protection orders are subject to strong seasonal influences, as is evidenced in the graph above. A statistically significant increasing trend\* is evident in the breach domestic violence protection order offences time series.

No statistically significant decreasing or increasing trend\* is evident in the Weapons Act offences time series. Since August 2011, the time series has been increasing to a peak in October 2014 and again in March 2015. The rate of Weapons Act offences increased by 20% in the current period under review.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

\*\* *The Domestic and Family Violence Protection Act 1989* (Qld) was expanded in March 2003 to include intimate personal, familial and informal care relationships.

# Monthly Crime Trends

While the time series for good order offences records a statistically significant upward trend\*, a strong seasonal influence can also be seen. Offences tend to peak in the summer months and fall to a low during the winter months of each year. Good order offences have recorded an increase of 3% in the current period.

Overall, a statistically significant decreasing trend\* was detected in the time series. Following a decrease in 2010/11 of 18%, the next 3 years reported increases of 1%, 1% and 3% respectively. The year under review reported a decrease of 9%.

\* The result is significant at the 1% level of confidence, using Kendall's rank order correlation test. See page 17 for further information.

## Annual Crime Trends

In this section, an examination of the number of selected offences per 100,000 persons is provided for a thirty year period. The rates provided in this section are based on Estimated Residential Populations, or projections thereof, at 30 June each year, provided by the Australian Bureau of Statistics and the Office of Economic and Statistical Research, Queensland.

Since 1985/86, many legislative changes have occurred, and the classification, recording and reporting systems used by the Queensland Police Service have evolved. Therefore, some offence categories, for which thirty years of comparable statistics are not available, have not been included.

The offence categories which have been included in this section are those that have a reasonable degree of consistency and comparability for the past thirty years. Some of these categories (such as unlawful entry and drink driving) have undergone considerable change at certain times. These breaks in continuity have been noted in the accompanying text where appropriate.

Prior to 1991/92, all crime statistics produced by the Queensland Police Service were based on the date the information related to the crime was received at the Information Bureau (and its precursors) in Police Headquarters. Since 1991/92, the reference date has been the date the offence is reported to police.

While this broad offence aggregate is comprised of a number of different offence categories, the offence category of assault tends to dominate offences against the person. As such, the offences against the person time series largely reflects the assault time series. Offences against the person has seen an increase during the late 1980s and early 1990s. The rate stabilised from the mid to late 1990s and has shown a decreasing trend since 2001.

\* The offence category of other offences against the person is not included in offences against the person.

# Annual Crime Trends

Homicide (murder) is a small volume offence and, as such, is subject to sizeable fluctuations from year to year. Overall, however, the homicide (murder) rate has changed little. Following a peak in 1996/97, the rate of homicide (murder) has been steadily decreasing until 2008/09. In 2009/10 the rate increased by 22%, followed by decreases of 9% and 20% in 2010/11 and 2011/12 respectively. In 2014/15 the homicide (murder) rate increased by 24% when compared with the previous year.

Other homicide is also a small volume offence category and, as such, is subject to sizeable fluctuations from year to year. From 1987/88 to 1989/90, other homicide offences were reported at a slightly higher rate; however the rate has steadily decreased since 1989/90. In 2014/15 there was an 17% decrease in the rate of other homicides, largely as a result of decreases in attempted murder and driving causing death offences.

# Annual Crime Trends

Looking at the overall trend, the rate of assaults steadily increased over the 1980s and into the early 1990s. Since 2000/01, the rate of assault has been steadily decreasing. During 2014/15 the rate of assaults decreased by 3% from that reported in the previous year.

Sexual offences may be reported to police many years after the offences actually occur and there are often numerous charges preferred against one offender. These factors have resulted in the fluctuations seen in the graph above. Queensland recorded an increase of 9% in the rate of sexual offences in the year under review compared with the previous year.

# Annual Crime Trends

Robbery offences increased sharply between 1988/89 and 1998/99. Since 2000/01 the overall decreasing trend for robbery is apparent in the graph above. The rate of robbery offences decreased by 17% in 2014/15. This is attributed to decreases in both sub-categories of armed and unarmed robbery.

Offences against property increased steadily from 1985/86 to 2000/01. From 2000/01 to 2009/10, the rate of total offences against property has decreased. In 2010/11 the rate increased by 4% followed by a 3% increase in 2011/12. Decreases of 1% in 2011/12 and 11% in 2012/13 were reported, followed by a 5% decrease in 2014/15.

# Annual Crime Trends

Unlawful entry involving breaking offences reported a steady increase in from 1987/88 to 1992/93. Throughout the 1990's the rate stabilised and has recorded a decreasing trend since 2000/01. The rate of unlawful entry involving breaking offences decreased by 19% in 2013/14, with a further decrease of 16% in the current period under review.

Arson offences have risen steadily up to 1996/97. Since then, the rate of arson offences has decreased until 2008/09 where there is an increase of 12% followed by another increase in 2011/12 of 24%. The past 3 financial years have seen decreases of 7%, 19% and 6% respectively.

# Annual Crime Trends

This offence category has increased steadily up to 2000/01. Since then, other property damage offences have decreased at a steady rate. A change in recording practices for this offence contributed to a 20% decrease in the rate for 2001/02. The rate of other property damage offences have reported decreases over the last three years of 6%, 13% and 13% respectively.

Unlawful use of motor vehicle offences recorded a substantial decrease over the period 1995/96 to 1997/98. Rates then rose sharply to again equal the high rates seen in the mid 1990's. From 2000/01, rates declined until 2010/11 where increases were reported until 2012/13. For the past two financial years the rate of unlawful use of motor vehicle offences has reported decreases of 20% and 12%.

\* The total for unlawful use of motor vehicle includes attempted offences

\*\* The break in continuity is the result of a policy change implemented in December 2001 (see Explanatory Notes section).

# Annual Crime Trends

As with most offences against property sub-categories, the sharp increase recorded during the late 1980s is evident in the graph above and this sharp increase was repeated in the late 1990s. A decreasing trend in other theft (excl. unlawful entry) offences was recorded from 2000/01 to 2007/08. From 2008/09 a reverse in this trend can be seen by increases of 1% in 2008/09, 3% in 2009/10 and 12% in 2010/11 and 4% in 2011/12. In the current year under review, the rate of offences has decreased by 4% following a decrease of 7% in 2013/14.

Fraud offences increased sharply from 1986/87 to 1987/88. The sudden decrease from 1987/88 to 1990/91 is due to a change in policy by banking institutions regarding the reporting of offences, rather than an actual reduction in offences. The figures reported for 2000/01 and 2001/02 effectively halted a steadily increasing trend evident over the last decade. From 2002/03 the rate has steadily decreased until 2011/12. In the 2014/15 year these offences have reported an increase of 26% which is attributed to increases in fraud by credit card, identity fraud and other fraud.

# Annual Crime Trends

Handling stolen goods was expanded in 1997/98 to include the sub-categories possess, receive, etc. tainted property and other handling stolen goods\*\*. Possess, receive, etc. tainted property is now the largest in volume of the offence sub-categories resulting in the necessity for caution when making comparisons prior to and following this change. In the year under review, the rate of offences decreased by 3%.

Apart from a period in the mid to late 1980s, drug offences have increased up to the current period under review. Between 2005/06 to 2010/11 there is a decrease of offences followed once again by an increasing trend. The current period under review has recorded an increase of 20% in the rate of drug offences.

# Annual Crime Trends

A dominant feature of the time series is the decrease in reported good order offences from 1988/89 to 1991/92 and the subsequent increase following that period. Since 1995/96, good order offences have been steadily increasing until 2010/11 which reported a 10% decrease. The last 2 financial years have reported increases of 9% and 3% respectively.

Analysis of the drink driving offence time series is difficult due to the many changes that have affected the overall trend (see Explanatory Notes, page 150). The graph remained stable at around 600 offences per 100,000 persons from 1991/92 to 2000/01. From 2000/01 to 2007/08 an increase in these offences has been reported. From 2008/09 offences have steadily decreased with the current period drink driving offences recording a 6% decrease.

## Regional Comparisons

The graphs in this section display changes in the rate of selected offences per 100,000 population from the 2013/14 to the 2014/15 financial years for Queensland Police Service regions.

The benefits of these graphs are twofold – the crime level of a region can be compared both with its own level in the previous financial year, and, secondly, with the crime levels of other regions. It should, however, be noted that each region faces unique policing issues. These graphs should not, therefore,

be used as a comparative measure of regional performance, but rather as a guide to crime trends and patterns across the State.

As with the rest of this review, the offences per 100,000 persons calculations were performed using the Estimated Residential Population for 30 June each year, or a projection thereof, provided by the Australian Bureau of Statistics and the Government Statisticians Office, Queensland.

In 2014/15, Northern Region recorded the highest rate of offences against the person as well as the only increase. Brisbane Region recorded the lowest rate and the greatest decrease was recorded by Central Region. Overall Queensland reported a 3% decrease in 2014/15.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Homicide (murder) is a small volume offence and, as such, is subject to substantial fluctuations over areas and across time. Thus, caution should be exercised when using percentage changes as a measure of change from one year to the next. Brisbane Region recorded the lowest rate while Northern Region recorded the highest rate as well as the greatest increase. The largest decrease was recorded by South Eastern Region.

Other homicide is also a small volume offence category and, as such, is subject to marked fluctuations from one year to the next and from one area to the next. As with homicide (murder), caution should be exercised when using percentage change as a measure of change from one year to the next. In 2014/15, South Eastern Region recorded the highest rate of other homicide as well as the only increase. Brisbane and Southern Regions recorded the lowest rate.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Northern Region recorded the highest rate of assault as well as the only increase in the State. The lowest rate was reported by Brisbane Region and the largest decrease was reported by Central Region in 2014/15.

It should be noted grievous assault is a low volume offence category and, as such, is subject to marked fluctuations from one year to the next. Northern Region recorded the highest rate as well as the only increase. Brisbane Region recorded the lowest rate and the largest decrease was recorded by Central Region.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Northern Region had the highest rate of serious assaults in the State as well as the largest increase along with Brisbane Region. Despite recording an increase, Brisbane Region reported the lowest rate in the State and Central Region reported the only decrease.

Northern Region recorded the highest rate of serious assault (other) offences, while Brisbane Region recorded the lowest rate and the largest decrease this year. Southern Region recorded the only increase for the current review period.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Central Region recorded the largest decrease in common assault and Brisbane Region recorded the lowest rate. Decreases in common assault were recorded by four of the five regions in 2014/15 with Northern Region recording no change when comparing 2013/14 with 2014/15.

Northern Region recorded the highest rate of sexual offences whilst the lowest rate was recorded in Brisbane Region. Southern Region recorded the greatest decrease and Brisbane and South Eastern Regions recorded the largest increase.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Increases in rape and attempted rape offences were recorded by four of the five regions with Queensland recording a 14% increase in the period under review. The highest rate was recorded by Northern Region while the lowest rate of rape and attempted rape was recorded by Brisbane Region.

The highest rate was recorded by Northern Region whilst the lowest rate was recorded by Brisbane Region where the largest increase was also recorded. Central Region recorded the largest decrease in the period under review.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

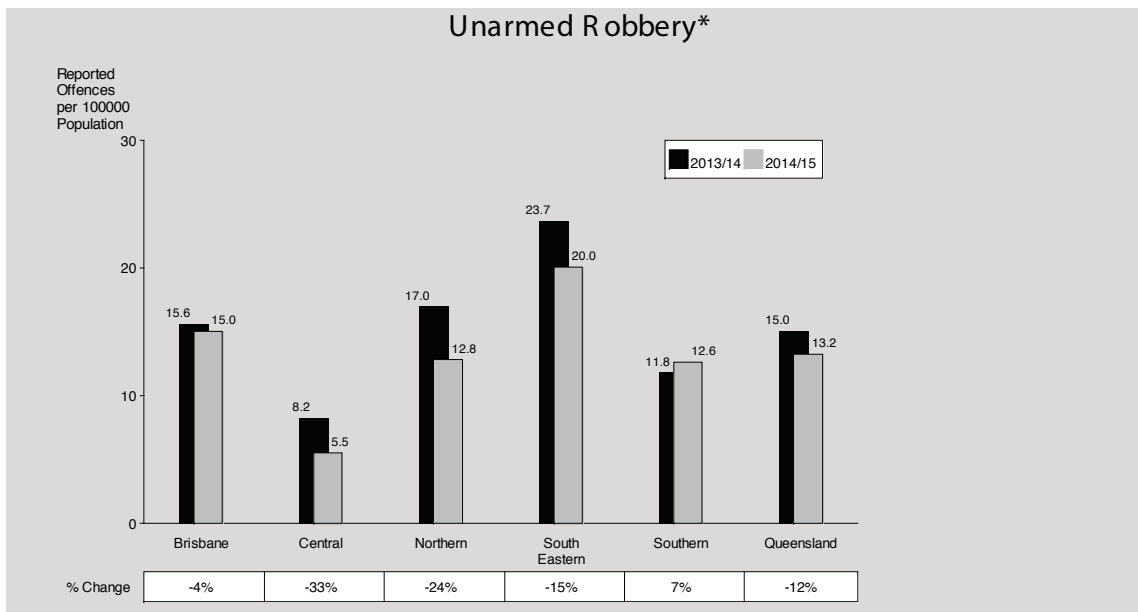

All five of the Regions recorded decreases in the rate of robbery offences in 2014/15 resulting in Queensland reporting a 17% decrease. South Eastern Region reported the highest rate while Central Region reported the lowest rate and the greatest decrease.

South Eastern Region recorded the highest rate and Central Region recorded the lowest rate. Decreases were reported by all Regions with the greatest decrease recorded by Brisbane Region. Queensland reported a 22% decrease in the rate of armed robbery offences in 2014/15.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

South Eastern Region recorded the highest rate of unarmed robbery and Central Region recorded the lowest. Southern Region recorded the only increase while Central Region recorded the largest decrease for unarmed robbery offences in the period under review.

The highest rate of kidnapping and abduction etc. offences occurred in Southern Region with the largest increase being recorded by Central Region. South Eastern Region recorded the largest decrease and Brisbane Region recorded the lowest rate.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Extortion is a low volume offence category and is, therefore, subject to fluctuations from area to area and from one year to the next. In 2014/15 Central Region recorded the highest increase in extortion offences. Brisbane Region recorded the largest decrease. The highest rate was recorded by South Eastern Region while the lowest rate was recorded by Northern Region.

Decreases were recorded in all five Regions with South Eastern Region recording the largest decrease in stalking offences. South Eastern Region also recorded the lowest rate while Northern Region recorded the highest rate.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Northern Region recorded the highest rate of life endangering acts offences and Brisbane Region recorded the lowest rate. The only increase occurred in Southern Region whilst Central Region recorded the greatest decrease in the 2014/15 period.

All five Regions reported decreases in offences against property which resulted in the State recording a 5% decrease. The highest rate was reported by Northern Region and the lowest rate was reported by Central Region. South Eastern Region reported the largest decrease in the rate of offences against property.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Unlawful entry tends to dominate the offences against property aggregate as is evidenced by the similarity in the distribution of property crime. All five regions recorded decreases in the current year with South Eastern and Southern Regions recording the largest decrease. Northern Region recorded the highest rate while Central Region recorded the lowest rate.

The lowest rate in the State occurred in Central Region, while the highest rate was recorded by Northern Region. Brisbane Region and South Eastern Region recorded the largest decrease and overall Queensland reported a 19% decrease over the last financial year.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Southern Region recorded the largest decrease and Central Region recorded the lowest rate for unlawful entry – shops offences. The highest rate was recorded by Northern Region despite recording a decrease.

All five regions recorded decreases in unlawful entry - other premises offences which attributed to Queensland recording a 7% decrease when comparing 2014/15 with 2013/14. Northern Region recorded the highest rate, while Brisbane Region recorded the lowest rate and Southern Region recorded the largest decrease.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

South Eastern Region recorded the largest decrease, however recorded the highest rate. Northern Region recorded the greatest increase and Brisbane Region recorded the lowest rate.

All of the regions recorded rate decreases which resulted in the State recording a 13% decrease when comparing 2014/15 to 2013/14. The lowest rate was recorded by Brisbane Region and the highest rate was reported by Northern Region. The largest decrease was recorded by Brisbane Region.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Rates of unlawful use of motor vehicles are traditionally highest in the South Eastern Region of the State as was the case in 2014/15 despite decreases in this area. Central Region recorded the lowest rate and the largest decrease in the period under review was recorded by Southern Region.

During 2014/15 all of the regions recorded decreases in other theft (excl. unlawful entry) offences, resulting in a 4% decrease recorded by Queensland overall. The highest rate of other theft occurred in South Eastern Region and Central Region recorded the lowest rate. Southern Region recorded the greatest decrease.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Southern Region recorded the highest rate of fraud offences in 2014/15 as well as the greatest increase. The lowest rate was recorded by Central Region. All of the Regions reported increases in these offences in 2014/15 which resulted in a 26% increase for the State.

Queensland reported a 3% decrease in the rate of handling stolen goods offences in the period under review. Northern Region recorded the highest rate in the State and Southern Region recorded the only increase. Central Region recorded the lowest rate while Brisbane Region reported the greatest decrease.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

Other offences are traditionally highest in the northern part of the State and 2014/15 was consistent with previous years with Northern Region reporting the highest rate. The largest increase was recorded by Southern Region.

In 2014/15, the highest rate of drug offences was recorded by Southern Region while Brisbane recorded the lowest rate. All five Regions reported increases with South Eastern Region reporting the greatest increase.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

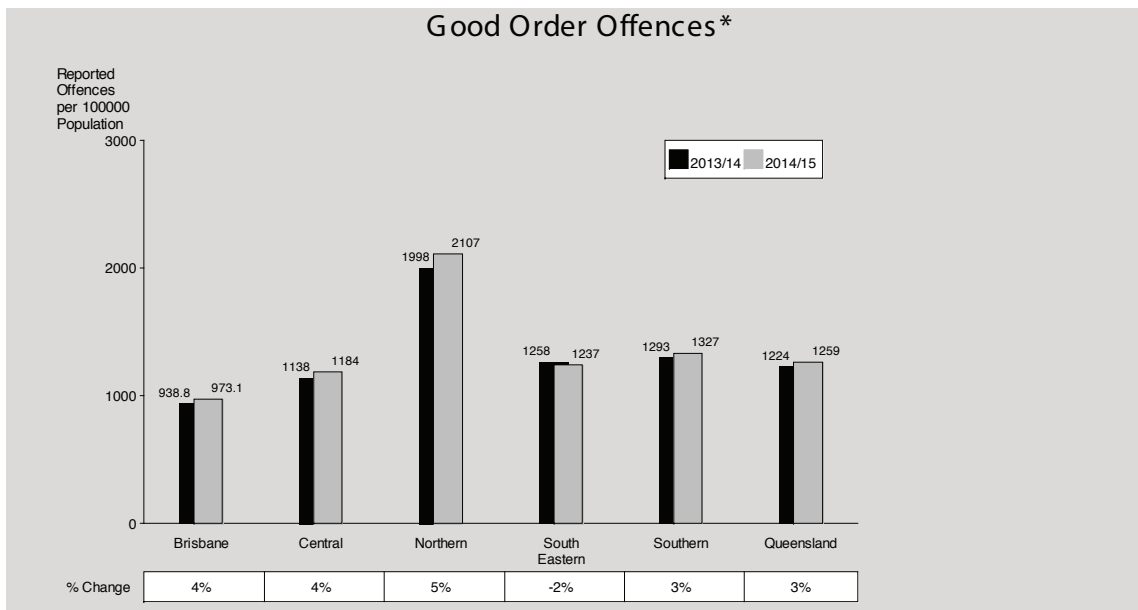

Northern Region recorded the highest rate in the State and the lowest rate was recorded by Brisbane Region. All five Regions reported increases which resulted in a 13% increase for the State in 2014/15.

Southern Region recorded the highest rate in Weapons Act offences while Brisbane Region recorded the lowest rate. The largest increase was recorded by Northern Region.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Regional Comparisons

The highest rate and the greatest increase was recorded by Northern Region. The lowest rate occurred in Brisbane Region and the only decrease was recorded by South Eastern Region.

For traffic and related offences, drink driving comprises the majority of offences. All five of the Regions reported decreases with South Eastern reporting the largest decrease. Northern Region recorded the highest rate.

\* Although offences per 100,000 persons have been rounded to one decimal place, the actual rate was used to graph the data and calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly in the smaller volume offence categories.

# Victims of Crime

This section contains detailed information relating to victims of offences against the person. They do not provide a unique victim count as one person may be counted several times if they were the victim of more than one offence.

There are several cases where the victim of an offence against the person is not, according to the statistical definitions used, a person. For example, the victim of an armed robbery of a bank is the banking organisation, rather than the teller, while ‘armed so as to cause fear or alarm’ is commonly a “Regina” offence, where the Crown is deemed to be the victim. Organisations which were the victims of crime were not included in the following tables and graphs.

As the graph below illustrates, females aged fifteen to nineteen years are the most common victims of offences against the person on a per capita basis. Females aged fifty-five and over are the least likely to be a victim of offences against the person. During 2014/15, there were slightly more male than female victims. Fifty-one percent of victims were male, while forty-nine percent of victims were female.

The Australian Bureau of Statistics’ *Population by Age and Sex, Australian States and Territories, December 2014 (3201.0)* was used to calculate the number of victims per 100,000 persons. ‘Age’ refers to the victim’s age on the date the offence was reported to police, rather than their age on the date the offence occurred.

\* Only those offences where the victim’s age and sex were identified are included.

# Victims of Crime:

## Victims of Crime by Age and Sex\* – 2014/15

Offence	0-14		15		16		17		18		19	
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female

\* Only those offences where the victim's age and sex were identified are included.

# Victims of Crime

Low rates of victimisation for homicide (murder) offences mean that rates fluctuate across age groups and from year to year. In 2014/15, females aged twenty-five to twenty-nine years were most likely to be victims of homicide (murder). Overall, 62% of victims were male and 23% of all victims were aged twenty-five to twenty-nine years.

Other homicide offences are also subject to fluctuations across age groups and from year to year as a result of low rates of victimisation. Males aged forty-five to forty-nine were most likely to be victims. Overall, 66% of victims were male. Of all female victims, those aged twenty-five to twenty-nine years were most likely to be victims of other homicide.

\* Only those offences where the victim's age and sex were identified are included.

# Victims of Crime

For every age cohort except fifteen to nineteen years, males were more likely to be victims of assault than females (58% of victims were male). Males aged twenty-five to twenty-nine years were most likely to be victims. The rate of females assaulted aged fifteen to nineteen years was higher than any other age group. The likelihood of being a victim of assault decreased with increasing age after nineteen years for females and twenty-nine for males.

The offence category of sexual offences is unique in that the number of female victims far outweighs the number of male victims (82% of victims were female). At every age, females were significantly more likely to be victims than males with females in the ten to nineteen years age range, the most likely. In fact, at this age females were almost six times more likely to be victims of sexual offences than males.

\* Only those offences where the victim's age and sex were identified are included.

# Victims of Crime

As with most other offences against the person, males were significantly more likely to be victims of robbery than females (68% of victims were male). Males aged fifteen to twenty-four years were most likely to be victims. After the age of twenty-four years, for both males and females, the likelihood of being a victim decreased significantly with increasing age until aged forty-five to forty-nine for females and fifty-five and over for males. In these age groups there is a slight increase in robbery rates. Note that robbery is unique in that a large proportion of victims are companies not individuals.

Other offences against the person is an amalgam of a number of different offence types including ill treatment of children, stalking, armed to cause fear, etc. This offence category, like sexual offences, is unique in that females are more likely to be victims than males. Females aged fifteen to twenty-nine years are the most likely victims of this offence type, making up 19% of total victims.

\* Only those offences where the victim's age and sex were identified are included.

## Offender/Victim Relationships

This section provides details of the types of relationships between offenders and victims for all offences against the person. Hence, only those offences that have been cleared are included in this section.

The statistics in this section are counts of victims, rather than offenders or relationships. They do not provide a unique victim count as one person may be counted several times if they were the victim of more than one offence.

The relationship classifications used are derived from those used by the *Australian Bureau of Statistics in Recorded Crime – Victims, Australia* (4510.0).

As recorded in the graph below, the offender was known to the victim in fifty-seven per cent of the cases where the relationship was identified, including twenty-four per cent where the offender and victim were related. The remaining ‘Known to Victim’ classification includes friends, colleagues, and both professional and other acquaintances.

\* Only those offences where the victim's age and sex were identified are included.

\* Only those offenders whose age and sex were identified are included.

# Offender/Victim Relationships

For approximately 54% of homicide (murder) offences, the offender was known to the victim. Thirty-five per cent of victims were from the same family as the offender, and this includes partners, spouses, children, siblings, grandparents, aunts, uncles and other familial relationships.

64% of other homicide cases, the offender was known to the victim. Of these cases, 27% committed by a family member. A further 37% of all victims were known to the offender either as friends, acquaintances, neighbours or colleagues.

\* Only those offenders whose age and sex were identified are included.

Note: Percentages have been rounded to the nearest whole number. Therefore, although the percentages are correct, they do not add to 100%.

# Offender/Victim Relationships

For all victims of assault, 55% were known to the offender. In 23% of cases, the offender was a family member and a further 32% were known to the offender either as friends, acquaintances, neighbours or colleagues.

For a substantial proportion of victims of sexual offences (approx. 75%) the offender was known to the victim. A large proportion of victims (35%) are of the same family as the offender while 40% were acquaintances, friends, neighbours or colleagues.

\* Only those offences where the victim's age and sex were identified are included.

Note: Percentages have been rounded to the nearest whole number. Therefore, although the percentages are correct, they do not add to 100%.

# Offender/Victim Relationships

For a large portion of victims of robbery offences (approx. 70%), the offender was not known to the victim. Robbery is unique in that very few offences are committed by persons known or related to the victim.

Of those relationships that were recorded for other offences against the person, in 28% of cases the offender was not known to the victim. Twenty-five per cent involved offenders who were related to the victim 52% were known to the victim.

\* Only those offenders whose age and sex were identified are included.

Note: Percentages have been rounded to the nearest whole number. Therefore, although the percentages are correct, they do not add to 100%.

# Offenders

The tables and graphs in this section provide information on persons responsible for offences. It is important to note that Queensland Police Service offender statistics are based on offence counts and do not and can not refer to individuals. Rather, offender data refers to the number of offences cleared or solved through an action against an offender. As such, offender data does not equate to a unique offender count nor does it equate to the number of offences cleared. For example, an offender charged with motor vehicle theft, unlawful entry, assault and other theft (excl. unlawful entry) would be included four times in any offender breakdown by age and sex.

Only persons aged ten years and over are deemed to be offenders. Under Queensland law, children under ten are not held criminally responsible, although

they may be involved in the commission of an offence. Juvenile offenders are those aged between and including ten and sixteen years.

Offenders have not been included if their age or sex is not specified in Queensland Police Service records. Less than 1% of offenders have been excluded for this reason.

The Australian Bureau of Statistics' *Population by Age and Sex, Australian States and Territories, December 2014* (3201.0) was used to calculate the number of offenders per 100,000 persons.

The reference date used to generate offender statistics for the year under review is the date an action commenced. As such, offenders proceeded against for matters reported in previous periods will be included in the following tables and graphs.

\* Only those offenders whose age and sex were identified are included.

# This category includes attempted offences.

\* Only those offenders whose age and sex were identified are included.

# Offenders

For all age groups, males were more likely than females to commit homicide (murder) with males aged twenty to thirty-nine years representing 52% of all offenders. Of those proceeded against for Homicide, 85% were male. Of the total 60 offenders responsible for homicide (murder) offences, only 9 were female.

Males aged twenty to twenty-nine years were most likely to commit other homicide offences. At every age, except ten to fourteen years, males committed more offences than females. In total, only 15% of those proceeded against for other homicide offences were female. Males aged twenty to forty-four years accounted for 61% of all offenders in this offence type.

\* Only those offenders whose age and sex were identified are included.

# Offenders

As with most offence types after the age of nineteen years, the likelihood of committing assault offences, decreases with increasing age for both males and females. Approximately 75% of offenders were male. In fact, 47% of offenders were male aged fifteen to thirty-four years. Both males and females in the fifteen to nineteen year age cohort were most likely to offend.

Sexual offences are unique in that the likelihood of offending does not decrease with increasing age to the same extent as other offences. In addition, most offenders were male (95%). During the 2014/15 financial year, there were 125 female offenders for sexual offences across the State compared with 2,517 males.

\* Only those offenders whose age and sex were identified are included.

# Offenders

Approximately 82% of offenders were male. Males and females in the fifteen to nineteen year age group were more likely to offend. In fact, males aged fifteen to nineteen years comprised 30% of all offenders. As with previous years, there were very few female offenders greater than 44 years. Five per cent of offenders were aged forty years or more and almost all of these were male.

Males aged fifteen to nineteen years were over three times more likely to commit offences against property than females in the same age group. In total, only 26% of offenders were female. At every age, males were more likely than females to offend for offences against property. The likelihood of offending after nineteen years of age, decreased with increasing age.

\* Only those offenders whose age and sex were identified are included.

# Offenders

As with most offence types, a large proportion of unlawful entry offenders were male aged fifteen to nineteen years (in fact, 87% of all offenders were male). Very few offences were committed by persons in older age groups (over thirty-nine years). Approximately 56% of offenders were male aged between ten and twenty-four years inclusive.

Approximately 44% of those proceeded against for arson offences were male aged between ten and nineteen years. While only 15% of offenders were female, the largest proportion were aged ten to fourteen years. As with most offences against property, very few offenders were recorded in older age groups (14% were forty years and over).

\* Only those offenders whose age and sex were identified are included.

# Offenders

As with most offences against property, the largest proportion (40%) of other property damage offenders were male aged between ten and nineteen years. At every age, males were more likely to offend than females (82% of offenders were male). In addition, as with most offences against property, there were very few offenders in the older age groups with 10% of offenders aged forty and older.

Approximately 33% of unlawful use of motor vehicle offenders were male aged fifteen to nineteen years. While only 17% of offenders were female, 36% of female offenders were aged fifteen to nineteen years. There were very few offenders (only 12%) in the older age groups (thirty-five years and over). Please note that attempted offences are included in this category.

\* Only those offenders whose age and sex were identified are included.

# Offenders

The other theft (excluding unlawful entry) offence category is one of a small number of offences against property committed by a substantial proportion of females. In 2014/15, 34% of offenders proceeded against for other theft (excluding unlawful entry) offences were female. Approximately 44% of the total offenders were male in the fifteen to thirty-four year age cohort.

Fraud is another of the offences against property for which a relatively high proportion of offenders are female. In 2014/15, 35% of those proceeded against for fraud were female. Males aged fifteen to thirty-nine years were most likely to offend (in fact, 79% of all male offenders were in this demographic).

\* Only those offenders whose age and sex were identified are included.

# Offenders

In all age groups, males were more likely than females to offend for handling stolen goods offences (73% were male). For both males and females, those in the fifteen to nineteen year age group were most likely to offend. The risk of offending, after the age of nineteen, decreased significantly with increasing age, apart from the thirty to thirty-four year age group for males, where there was an increase in offending.

The majority (78%) of offenders for other offences were male, with males aged fifteen to twenty-nine years comprising 41% of offenders in 2014/15. Approximately 68% of offenders were aged under thirty-four years. Of all female offenders, those aged twenty to twenty-four years were most likely to offend.

\* Only those offenders whose age and sex were identified are included.

# Offenders

Approximately 76% of offenders for drug offences were male, with the majority aged between fifteen and twenty-four years inclusive. Females in the fifteen to twenty-four year age bracket were also more likely to offend compared with those in other age groups. Unlike other offence categories, a sizeable proportion (30%) of offenders were aged over thirty-four years.

Approximately 86% of offenders for breach of domestic violence protection orders were male and most were aged between twenty and thirty-nine years (59%). Unlike other offence categories, a significant proportion of offenders (27%) were in the older age groups (forty years and over).

\* Only those offenders whose age and sex were identified are included.

# Offenders

Approximately 88% of those actioned against for Weapons Act offences were male and most were aged twenty to twenty-four years, although a significant proportion were aged over thirty-nine years. For females, those aged fifteen to twenty-nine years were most likely to offend. As is evidenced in the graph above, the risk of offending after the age of twenty-four decreased as age increased.

Patterns of offending for good order offences are typical of those displayed in most offence categories. The majority of offenders were male (78%) with males in the fifteen to twenty-nine age group most likely to offend (49% were in this demographic). After the age of twenty-four years, the likelihood of offending decreased with increasing age.

\* Only those offenders whose age and sex were identified are included.

## Crime Locations

This section provides a breakdown of crime by the type of location in which the offence occurred. The location classifications are based on those used by the Australian Bureau of Statistics in compiling the *Recorded Crime – Victims, Australia (4510.0)*. A crime location is defined as the initial site where a criminal incident occurred, classified by the primary function of that site where the site has more than one function. This definition may encompass any surrounding land, yard, car parking area, together with any other structures existing at the location.

# Crime Locations: Queensland 2014/15

## District Crime

In this section, a detailed examination of reported and cleared crime is provided for the Queensland Police Service's statistical regions and districts during the 2014/15 financial year.

The tables include some offences where the Police District in which the offence occurred cannot be identified according to current police boundaries. There are two instances where this may occur:

- The offence was detected as part of a covert operation, and the location of the offence has not currently been recorded to maintain security; and
- The accuracy of the address has not been determined at the time that the data was extracted for inclusion in this publication. That is, the address was not verified.

In these cases, the offences have been included in the highest hierarchical geographical level available. Therefore, police district statistics may not always sum to regional totals, or regional statistics to Queensland totals.

## District Crime:

\* Only persons whose age and gender were identified are included.

The accuracy of the address has not been determined at the time the data was extracted for inclusion in this publication. Therefore, police district statistics may not also sum to the regional totals, or regional statistics to Queensland totals.

## Traffic

This section contains information relating to traffic crashes, speed, red light camera notices and random breath tests within Queensland.

All data included in this section were provided by the Road Policing Command, Queensland Police Service and are current as at 30 June 2015.

Data relating to traffic crashes and injuries other than fatalities were not available at the time of publication.

Queensland's road fatality rate for the 2014/15 financial year was 5 fatalities per 100,000 persons. Queensland recorded a 2% increase in the rate per 100,000 persons when compared with the previous year.

<b>Queensland</b>	<b>163501</b>	<b>186212</b>	<b>14%</b>	<b>1.05</b>	<b>1.27</b>	<b>21%</b>

Please Note:

1. Data is extracted from camera databases within the Queensland Police Service (Traffic Camera Office). These systems are live databases and the reported statistics may vary on a daily basis.
  2. Any data which is extracted less than six weeks from the end of a reporting period is considered preliminary.
  3. Offences from road safety cameras do not necessarily result in the issuing of an infringement notice. Offences from cameras are adjudicated by an accredited Traffic Camera Office staff member. The adjudication process assesses whether there is sufficient evidence to meet legal requirements to issue an infringement notice. Differences observed between offences and notices issued will be the result of this adjudication process.
  4. Vehicles Monitored relates to the number of vehicles the camera detects as passing the camera and is an automated process performed by the camera. Portable Mobile Speed Cameras are aimed at a specific vehicle and not all vehicles passing that location and therefore do not collect a total vehicles count.
- \*\* Although offences per 1,000 vehicles or per hour have been rounded to the nearest whole number, the actual number was used to calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly where numbers are low.
- <sup>^</sup> Figures include data for digital combined speed/red light cameras (red light offences only).
- \* Portable devices do not collect a vehicle count, so data for Mobile Speed Cameras (Overt, Covert & Portable) is represented in 'Offences Per Hour' rather than 'Offences Per 1,000 Vehicles'.
- <sup>#</sup> Figures include data for digital combined speed/red light cameras (speed offences only).

\* Random Breath Testing data by geographical region for 2014/15 has been sourced from the Intelligence Tasking Analysis System (I-TAS) on 30/07/2015 and is preliminary and subject to change. Region 'other' is inclusive of random breath tests undertaken by units that are central to a command (i.e. Not hosted in regions). For example units under Commander Road Policing Command (Roadside Drug Testing Unit, Road Policing Task Force and Brisbane Forensic Crash Unit) are included in region 'other'.

^ Note: Other RBT types include alcoholmeter reason codes RBT water, heavy vehicle and behaviour. Data on positive roadside tests was sourced from QPRIME. Data on number of roadside drug tests was sourced from ITAS RDT module and databases maintained by Statewide Drug Testing project. Data is preliminary and subject to change.

### Vehicle Impoundments – Number of Type 1 and Type 2 Vehicle Impoundments# – 2013/14 and 2014/15

Region	Number Vehicle Impoundments (Type 1)			Number Vehicle Impoundments (Type 2)		
	2013/14	2014/15	Percentage Change	2013/14	2014/15	Percentage Change**
Brisbane Region	181	214	18%	2273	2576	13%
Central Region	309	323	5%	2303	2658	15%
Northern Region	168	191	14%	1561	1886	21%
South Eastern Region	235	211	-10%	2536	2528	0%
Southern Region	223	231	4%	2740	3206	17%
<b>Queensland</b>	<b>1116</b>	<b>1170</b>	<b>5%</b>	<b>11418</b>	<b>12858</b>	<b>13%</b>

# Data has been sourced from QPRIME Zap Analysis. Data is accurate as at 12/07/2015. The totals in the regional data may not match the Queensland total due to incorrect data entry (e.g. There was no geographical boundary inputted resulting in an 'exception'). Vehicles impounded includes vehicles subject to immobilisation, impoundment or eligible for forfeiture. Data is counting vehicles impounded and not offences. Not every offence will result in an impoundment or immobilisation. Therefore the number of impoundments and immobilisations will be less than the number of offences.

\*\* Although offences per 1,000 vehicles or per hour have been rounded to the nearest whole number, the actual number was used to calculate the percentage change between the two periods. Therefore, although the change values are correct, they may not appear so, particularly where numbers are low.

<b>Total</b>	<b>144</b>	<b>100%</b>

**Caveat:** Data pertaining to reported pursuits has been extracted from the pursuit database, currently maintained by Road Policing Command. Pursuits are identified for inclusion in the database upon entry into the SEMS, and/or QPRIME, and/or upon identification by the SERP and/or upon identification of a pursuit after an audit of evade police offences by a professional practice manager. Data was extracted on 21 July 2015. Data is preliminary and subject to change.

#### Legend for Pursuit policy reason type

^ As per Traffic Manual 10.5.2 Justification for pursuit;

Pursuits are permitted only where officers have a reasonable belief that an occupant of the vehicle:

- (i) will create an imminent threat to life; or
  - (ii) has or may commit an act of unlawful homicide or attempt to murder; or
  - (iii) has issued threats to kill any person and has the apparent capacity to carry out the threat; or
  - (iv) has committed an indictable offence prior to an attempt by police to intercept the vehicle;
- AND
- (v) the imminent need to apprehend the person is considered justifiable given the risks of pursuing

Matters which officers are not permitted to pursue (NPM = Non-pursuable matters) include:

- licence, vehicle or street checks;
- routine traffic interceptions where no other offence exists apart from failing to stop as directed;
- random breath tests;
- all simple offences (including traffic offences and evasion offences); and
- indictable offences based on officer instinct alone or suspicion only (without supporting evidence).

# Traffic

<sup>^</sup> The aggregate of region totals do not equate to the number of tests conducted state-wide.

\* Region 'other' is inclusive of random breath tests undertaken by units that are central to a command (i.e. Not hosted in regions). For example units under Commander Road Policing Command (Roadside Drug Testing Unit, Road Policing Task Force and Brisbane Forensic Crash Unit) are included in region 'other'.

Brisbane Region recorded the highest number of red light camera offences in the State and Southern Region recorded the lowest despite recording the largest increase in offences. The largest decrease was recorded by Central Region.

# Traffic

Brisbane Region recorded the highest number of mobile speed camera offences in the State and Southern Region recorded the lowest. The greatest increase was recorded by South Eastern and overall Queensland recorded a 29% increase in these offences.

South Eastern Region recorded the highest number of fixed speed camera offences in the State as well as the greatest increase. Central Region recorded the lowest number of these offences and the largest decrease was recorded by Southern Region.

## Crime Statistics in Focus

This chapter has been introduced to provide a detailed examination for selected topics of public interest.

The tables offer information on the reported number and rate per 100,000 persons for public nuisance offences, Move-on Directions and assaults on Police. The number of Domestic Violence Protection Orders and the number and rate per 100,000 persons for Breach of Domestic Violence Protection Orders are also provided.

These statistics have been provided for the Queensland Police Service's statistical regions and districts.

<sup>1</sup> The region total for Actual Strength includes employees for Regional Functions and the Brisbane Watchhouse.

<sup>2</sup> Due to the rounding, the aggregate of region totals do not equate to the Queensland total.

<sup>3</sup> Staff Members include Public Service Officers, Police Liaison Officers, Assistant Watchhouse Officers, Queensland ATSI Police and other Temporary and General Employees.

Note: The aggregate of district totals may not equal regional totals [see detailed explanation on page 97].

# Police Regions and Districts

## Explanatory Notes

### Explanatory Notes

The interpretation of police crime statistics is not a simple task. Before an appreciation for the value and utility of crime statistics is possible, it is necessary to understand the conventions and bounds of police crime statistics as well as the various external variables which may affect them. These include the procedures used by the Queensland Police Service (QPS) in the compilation and collation of crime statistics, the definitions and rules QPS follows in producing crime statistics, and the social and environmental factors that may have an impact on the statistics.

Once an understanding of the scope of police crime statistics is achieved, the value of the information they provide and its worth as a research and planning tool becomes evident. QPS strives to maintain absolute integrity and accuracy in the production of these statistics and publishes the Annual Statistical Review as its official public record of statistics pertaining to police, crime and related matters. To assist in using the information contained in this publication, a detailed summary of the above-mentioned definitions and conventions is provided over the following pages.

### Reporting and Detection Rates

A major environmental factor that impacts on the use of police crime statistics as an indicator of total crime levels in Queensland is the level of reporting by the community.

The rate of crime reporting may vary according to many factors. This includes the perception by members of the community as to whether an offence has actually occurred, and whether the offence is reported by the victim or a community member to the QPS.

According to both Office of the Government Statistician (OGS) and Australian Bureau of Statistics (ABS) Surveys, the most common reason for not reporting crime was that the offence was considered too trivial. The second most common reason was that the victim doubted the police could or would take action.

Another factor which has a major impact on crime statistics is the priorities and activities of the QPS.

An expansion of the Drug Squad, for example, may result in an enhanced ability to detect drug offences within Queensland. An increase in the number of drug offences recorded in police crime statistics may, therefore, be directly related to the effectiveness of the Squad rather than an actual increase in drug offences in Queensland.

In order to gain a more comprehensive picture of the nature and extent of crime, QPS crime statistics should be examined in conjunction with information from other sources such as Victims of Crime surveys and criminological research.

### Recording Offences

The crime statistics presented in this Review were derived from the Queensland Police Records and Information Management Exchange (QPRIME, 2007) database.

After becoming aware of an offence the reporting officer contacts PoliceLink by telephone as soon as practicable. A twenty-four hour data entry service exists to facilitate this process. The offence is recorded, classified and counted by the data entry staff. This process provides the benefits of reducing police officers' administrative workloads as well as providing an accurate and immediate computerised record of crimes.

### Crime Statistics Collection

#### Reference Period

For the purposes of this Annual Statistical Review, the reference period is the financial year, 2013/14 to 2014/15.

#### Reference Date

The reference date for reported offences is the date an offence is reported to or detected by police. For cleared offences, the reference date is the date the offence was cleared by police. For offender statistics the reference date is the date an action is commenced.

## Data Source

### Crime

All Queensland Police Service crime statistics are derived from the data contained in official crime reports.

Since June 2007, official crime reports have been recorded in the Queensland Police Records and Information Management Exchange (QPRIME). Crime reports recorded between December 1994 and June 2007 have been converted from Crime Recording Information System for Police (CRISP) to QPRIME.

Prior to December 1994 crime reports were derived from data entered into the crime statistics database maintained by the Statistics Section of the former Information Management Bureau (and its precursors).

“Cancelled” and “Not substantiated” or “unfounded” reports are excluded from QPS published crime statistics information.

### Population

The population data used to calculate the number of victims and offenders by age and sex per 100,000 population was taken from *Australian Demographic Statistics December 2014 (ABS Catalogue No. 3101.0)*.

All other rate calculations throughout the publication are based on a projection of the Estimated Residential Population as at June 2014 (for 2013/14) and June 2015 (for 2014/15) as provided by the ABS and the Office of Economic and Statistical Research, Queensland.

## Rates and Numbers

### Methodology

Numbers of offences are simply the number of offences occurring (recorded by police) within a specific area and for a specified period of time. These are presented as simple counts. The problem with using crime numbers to gauge the true level of crime is that areas with larger populations will presumably have higher numbers of crime than areas with smaller populations.

Rates displayed in this publication are always presented per 100,000 persons. Calculation of rates allows direct comparisons of crime to be made across different geographical areas (State, regions and districts) and across time since the size of the population is taken into account in the calculation.

Rates are calculated as:

$$\frac{\text{No. of Reported offences} \times 100,000}{\text{Estimated Residential Population}}$$

### Interpreting Rates and Numbers

It is important to note that transient population groups such as tourists are not factored into the estimated population. This would have particular impact on high tourism areas where crime rates would be overestimated.

Caution should be exercised when using either numbers or rates alone to measure crime in specific and different areas. Rates, for example, are sensitive to small populations. Both numbers and rates of reported offences have particular uses and should be presented together to give a clear and balanced picture of the level of crime.

Percentage changes are another type of rate which requires caution when interpreting. Small numbers of offences can result in large percentage changes.

Comparisons of crime rates over different areas should be interpreted with great caution due to the many factors which differ from community to community. The level of crime in any community is affected by the number and composition of its population, with particular reference to age, sex, ethnicity and employment. The climate and geographical features of the community are important as is the economic structure including the local industry and the level and distribution of income. The attitude of the public toward crime can also impact upon local crime levels.

Crime statistics for low volume offence categories tend to fluctuate randomly and dramatically from one year to the next. This can cause difficulties in the identification of trends and patterns in the levels of offences. It is, therefore, important to approach these low volume offence categories with caution when looking at trends and even when making comparisons across geographical areas.

### Unreported Crime

QPS crime data can only relate to the offences which have been reported to police. Obviously, there is a large proportion of crime that is never reported. Various surveys, for example, Crime Victimisation, Australia and Crime and Safety Surveys, are conducted by the ABS to determine the level of unreported crime. The reporting rate can vary dramatically across offence types. For example, approximately 88 per cent of all motor vehicle theft is reported to police whilst only 38 per cent of sexual offences are reported. It is important to keep this in mind when using crime data. Relying on reported offences only can lead to an underestimation of the true rate of victimisation.

## Offence Classification

The offence categories used by the QPS for crime statistics are based on the Australian National Classification of Offences (ANCO), prepared by the ABS. ANCO was designed to provide a national framework for classifying offences for statistical purposes. The Australian Standard Offence Classification (ASOC) has been implemented in some jurisdictions by the National Centre for Crime and Justice Statistics of the ABS, and will eventually supersede ANCO. However, the QPS crime statistics collection will continue to be based on ANCO.

Crime statistics are presented under three broad offence divisions: offences against the person; offences against property; and other offences. These three primary divisions have been developed to facilitate the understanding of crime statistics by grouping similar offence categories together. Following are the offence sub-divisions located within each of these primary categories.

### Offences Against the Person

The offence division of offences against the person includes the following offence sub-divisions: homicide (murder), other homicide; assault; sexual offences; robbery; and other offences against the person.

### Offences Against Property

The offence division of offences against property includes the following offence sub-divisions: unlawful entry with Intent; arson; other property damage; unlawful use of motor vehicle; other theft (excluding unlawful entry); fraud; and handling stolen goods.

### Other Offences

The offence division of other offences includes the following offence sub-divisions: drug offences; prostitution offences; liquor (excluding drunkenness); gaming, racing and betting offences; breach of domestic violence protection orders; trespassing and vagrancy; Weapons Act offences; good order offences; stock related offences; traffic and related offences; and miscellaneous offences.

Many offence sub-divisions are divided into offence groups and then offence sub-groups. Reported and cleared offence statistics in this publication are presented to a group level in most sections.

## Geographical Classification

Queensland crime statistics are compiled to four hierarchical geographical levels. Firstly, statistics are compiled for the State as a whole. Below this, QPS

divides the state into five statistical regions. The next geographical level is that of statistical districts, of which there are 15 throughout the State. Finally, these districts are divided into 335 statistical divisions. Reported and cleared offence statistics are presented at State, Regional and District levels in this Review.

## Counting Methodology

The counting rules used by the QPS in the collection and collation of crime statistics are based on the guidelines published in the *National Crime Statistics Manual* (ABS) and as amended from time to time by the National Crime Statistics Advisory Group.

The national counting rule is that for each victim within a distinct criminal incident, the Most Serious Offence (MSO) per ANCO subdivision is counted. The national data set does not include 'victimless' offences such as those detailed in the QPS division of other offences. The QPS counting rule for offences of this type is to count each distinct criminal act per criminal incident.

Where the victim based rule applies, the description of a victim varies according to the type of offence. A victim may be an individual person, an organisation, a place/premise, or a motor vehicle (refer to Glossary for definition of victim).

The application of the MSO rule has major implications for the recording of crime statistics. By applying the MSO rule a single criminal incident may result in a number of offences being recorded. For incidents where the same victim is subjected to multiple offences belonging to different subdivisions, one offence, the most serious, is counted within each subdivision. For example, if a person is kidnapped and then raped by two offenders, one kidnapping/abduction/deprivation of liberty and one rape would be counted.

## Exceptions to Counting Rules

The offence subdivision of sexual offences (which includes rape and attempted rape and other sexual offences) is an exception to the national counting rule. The counting rule applied by the QPS in respect of this group of offences is that for each victim the MSO per ANCO subdivision is counted on the basis of time and place.

The effect of using this rule is that if a victim is subjected to numerous sexual offences over a long period of time by one offender and these actions come to the attention of police at one point in time, the MSO per separate incident based on time and place is counted. Therefore, it is only possible to identify the number of offences, not victims, of sexual offences. A count of ten sexual offences may mean that there were ten victims or that one victim was subjected to

ten offences over an unspecified time period by one or more offenders.

Fluctuations in the number of reported offences for this offence category must therefore be considered with caution, due to the effects of the current counting rule.

## Victims of Crime

The Victims of Crime statistics presented in this Review are compiled on the basis of one victim per counted offence. The statistics do not provide a unique victim count. For example, where the same victim is subjected to multiple offences belonging to different offence sub-divisions within an incident, then in accordance with the MSO rule, that victim would be recorded for each most serious offence per sub-division.

It is important to remember that these statistics are derived using a system whose primary function is to service operational policing. Consequently, there may be slight variations between offence and victim counts.

Statistics relating to victims of offences against property are not included. This is due to the statistical definition of 'victim' used by the QPS, that is, a victim may be an individual person, an organisation, a place or premise, or a motor vehicle (refer to Glossary).

Offences included in the other offences division are also excluded, as these offences are usually deemed to be 'victimless' offences.

There are several offence groups in offences against the person where the victim may be an organisation rather than an individual person. Examples include robbery committed upon a banking institution or business, and extortion committed upon organisations. It should be noted that these offences are not included in the victim count.

## Offender Counting

Offender statistics are based on offence counts and do not and can not refer to individuals. The data refers to the number of offences cleared or solved through an action against an offender. As such, offender data does not equate to a unique offender count and nor does it equate to the number of offences cleared. For example, an offender charged with motor vehicle theft, unlawful entry, assault and other theft would be included four times in any offender breakdown by age and sex.

Only persons aged ten years and over are deemed to be offenders. Under Queensland law, children under ten years of age are not held criminally responsible, although they may be involved in the commission of an offence. Juvenile offenders are those aged between and including ten and sixteen years.

Offenders have not been included if their age and sex is not specified in QPS records. Less than 1% of offenders have been excluded for this reason.

## Drink Driving Offences

Examples of significant events affecting the drink driving time series include:

- 04/05/1985 – Legal blood/alcohol limit for persons under 18 years lowered to 0.02%;
- 1986/87 – Reduce Impaired Driving (RID) campaign introduced;
- 01/01/1989 – Random Breath Test (RBT) formally commenced;
- 04/10/1991 – First two Mobile Breath Stations (Booze Buses) introduced.
- 01/07/2012 – Introduction of Drink Driving 0.05 and under 0.10 which replaces Drink Driving 0.05 and under 0.08;
- 01/07/2012 – Introduction of Drink Driving 0.10 and under 0.15 which replaces Drink Driving 0.08 and under 0.15.

## Drug Enforcement Region

Offences detected or under investigation involving covert drug operations or sensitive issues such as sexual child abuse are not geographically classified until after the completion of all inquiries in the interest of strict confidentiality. For this reason, a temporary holding geographical classification, the Drug Enforcement Region, has been created. Offences classified to this area are included only in Queensland offence counts in this Review.

## Other property damage – Change in Policy

In December 2001, the Service implemented a change in policy in regard to the reporting of other property damage offences. Prior to this change, the offence of wilful damage was automatically recorded in conjunction with some unlawful entry and unlawful use of motor vehicle offences. As damage to property is an intrinsic part of break and enter offences, the Service altered the policy so that the offence of wilful damage is no longer recorded with these offences.

## Glossary

### Symbols and Abbreviations

n/a	not available
-	not defined
0	nil
nec	not elsewhere classified
nfd	not further defined
ATSI	Aboriginal and Torres Strait Islander

### Offence

For statistical purposes an offence is any act reported to or becoming known by the police, which they consider, prima facie, to be in breach of the criminal law. With the exception of murder, each offence count represents an actual offence, an attempted offence, a conspiracy, or the aiding or abetting of an offence. In the case of murder, these categories are distinguished.

### Reported Offences

Reported offences refer to all established offences reported to or becoming known to the police within the relevant reference period.

### Not Substantiated

An offence is “*not substantiated*” or “*unfounded*” when investigation has established that the alleged offence was not in fact committed. This includes a false report, a mistake in the facts as reported by the informant, or no breach of the law involved in the alleged offence.

Inability to prove an ingredient of an offence does not make an offence “not substantiated” nor does a decision by a complainant not to proceed after the offence has been reported.

### Cleared Offences

An offence is deemed to be cleared under, but not restricted to, the following circumstances:

- At least one offender has been arrested or summonsed or issued with a notice to appear, or information has been laid to compel an offender’s appearance before a court;
- Action has been taken against at least one offender under the provisions of the *Youth Justice Act, 1992* (Qld) (e.g. administration of an official caution, summons or reference to a community conference);
- At least one offender has been dealt with in accordance with Queensland Police Service policy (e.g. informal counselling of children and elderly persons);
- The offender has admitted the offence but there is an obstacle to proceedings (e.g. diplomatic immunity);
- The offender is known and sufficient evidence has been obtained, but the complainant refuses to prosecute;
- The offender is in another jurisdiction and extradition is not desired or not available;
- The offender is serving a sentence and no useful purpose would be served by prosecution;
- The offender has died before proceedings can be commenced;
- The offender has been admitted to a mental institution before charges are laid and release is unlikely;
- The offender is being offered drug diversion for a minor drug offence;
- There is some other bar to prosecution;
- The offender is dealt with by ex-officio indictment;
- The offender is being dealt with by another agency apart from QPS;
- The complainant or essential witness has died and proceedings would be abortive;

- Following a complaint the complainant has requested that police take no further action;

*The recovery of stolen or otherwise unlawfully obtained property, e.g. a motor vehicle, does not in itself clear or solve an offence.*

## Number of Offences Cleared

Cleared offences are presented in this publication in two groups, i.e., those that were both reported and cleared in the reference period, and those that were cleared in the reference period but reported previously.

## Percentage Cleared

Percentage Cleared is the percentage of offences that were reported within a specified period that were also cleared within that period.

## Offender

An offender is any person who, through the clearance of an offence, is deemed to be responsible for committing that offence.

## Action Type

The following definitions apply to the action types presented in the tables appearing on pages 80 and 81, Offenders, Indigenous/Non Indigenous – Queensland by Type of Action by Age:

- Arrest: The taking into custody of an offender to compel that person's appearance before a court;
- Summons: A direction or command issued by a magistrate or justice to an offender to appear before a court with reference to a matter described therein, at a given time and place;
- Notice to appear: A notice issued and personally served by a police officer upon an offender whom he/she reasonably suspects has committed or is committing an offence, to appear before a court, with reference to a matter described therein, at a stated time and place;
- Warrant: For the purposes of this application, a warrant is an authority under the hand of a judge or justice to arrest an offender in order that the person may be dealt with according to the law;
- Caution: An official caution administered to a child under the provisions of the *Youth Justice Act, 1992* and includes the cautioning of persons over 65 years of age and intellectually disabled persons for minor criminal offences in accordance with official Service policy. The term does not apply to any informal process where a child is spoken to by an officer where the officer is exercising discretion in relation to the child's particular behaviour or actions;
- Community Conference: The referral of a child under the provisions of the *Youth Justice Act, 1992* to community conference by a police officer before the start of a proceeding for an offence, or by court after a finding of guilty is made against a child for the offence;
- Other: The offender is known and sufficient evidence has been obtained but there is a bar to prosecution or other official process (see also definition of cleared offences on the previous page).

## Victim

The description of a victim varies according to offence type:

- for homicide, assault, sexual offences and other offences against the person subdivisions, the victim is an individual person;
- for robbery, extortion, arson, other property damage, stealing (excluding motor vehicles), and fraud, the victim may be either an individual person or an organisation;
- for motor vehicle theft, the victim is the motor vehicle;
- for offences of unlawful entry, the victim is the place/premise as defined on the basis of occupation/ownership.

## Crime Location

The crime location is the initial site where a criminal incident occurred, classified by the primary function of that site where the site has more than one function.

## Indigenous Identification

In January 2003 it became mandatory for Queensland police officers to ask all offenders the question: Are you of Aboriginal or Torres Strait Islander origin? It is the choice of the person being asked this question to identify their origins as either of the following four: Not Aboriginal or Torres Strait Islander, Identifies as Aboriginal, Identifies as Torres Strait Islander, Identifies as Aboriginal and Torres Strait Islander. If identification has not been made, a reason is recorded within the occurrence.

Since the implementation of QPRIME in June 2007, the indigenous status indicator has not been captured in 10% of cases for the 2014/15 financial year. For these instances, the indigenous indicator has been applied by extracting the indicator from previous identifications. Instances where the indicator was not captured using this method have not been included in the current publication. This was the case in approximately 3% for the period under review.
